DEAN'S MESSAGE

"It is hard to believe that seven classes of students have already graduated from the FSU College of Medicine. Thanks to the dedication and expertise of our local physician faculty, the Pensacola Regional Campus graduated its 96th student in May 2011. As wonderful as those numbers are, they are just numbers. The real story lies behind the numbers. It is the story of a medical community coming together to establish the next generation of physicians for the state of Florida. It is the untold hours of work on our students' part to prepare and prove they have what it takes to be compassionate, patient-centered physicians, many serving in communities that need physicians now more than ever. It is a loyal community faculty dedicated to lifelong learning in their quest to educate our students and also bring valuable knowledge to the care of their patients. In the coming years, many more students will graduate and pursue their dreams as a result of our community-based model of medical education. Nothing could be more important for our students, our physician faculty members and the community that they serve."
