

ECPP Patient Safety Simulation Activities—December 12, January 9

Competencies to be addressed by simulations

- Communications
 - Clarify instructions/time for questions or confirming orders
 - Repeating orders
 - Communication with family and then relating those to rest of team
 - Consult call
- Teamwork
 - Definition of roles/responsibilities
 - Using all team members
 - Communications within team
- Stress
 - Managing stressful situations
 - Medical emergency
 - Impaired professional [tired, other impairment]
 - Abusive professional
- Leadership
 - Does someone step forward to lead?
 - Do members support the leader
 - Conflict resolution
 - Delegation of tasks

Possible Scenarios

- Communication Scenario
 - Communication between doc and family
 - Communication between doc who talks to family and team
 - Call for consultation
 - Definition of roles/ responsibilities on team
 - NOTE: Patient is manikin; family member is SP
- Teamwork in the face of stress
 - Stressful clinical scenario
 - Team member who is impaired or disruptive
 - SP is the “bad” team member
- Leadership and Teams
 - Code situation
 - Taking leadership role
 - Delegation of tasks
 - Calling for help

Logistics

- Teams of 5 or 6
- 10 minutes for sim, 20 for debrief
- 2 cases per team [simultaneous]
- Feedback from SP’s and Faculty

What will the M3’s do when they are not in simulation?

- Watch videos/films and complete a “patient safety checklist”
- Open forum about patient safety
- View video of Rosemary Gibson talk to M1’s
