

# Florida State University COLLEGE OF MEDICINE

# HONORS MEDICAL SCHOLARS PROGRAM

The Honors Medical Scholars Program recruits students interested in medicine who demonstrate a high level of academic ability, a heart for service, and sincere concern for vulnerable populations through volunteering.

*Our goal is to develop resilient and adaptable scholars reflecting the same values and mission as College of Medicine graduates: practice patient-centered health care, discover and advance knowledge, and respond to community needs, especially through service to elder, rural, minority, and under-served populations.*

As undergraduate students, Honors Medical Scholars benefit from:

- Specialized advising
- A faculty mentorship program
- Medical and community volunteer activities
- The Honors Medical Scholars Society
- Early-decision eligibility to the FSU College of Medicine

*The Honors Medical Scholars Program is not a Bachelor of Science/Doctor of Medicine program. While not guaranteed admission into the College of Medicine, FSU Honors Medical Scholars who complete the program and premedical requirements will be eligible to apply to the FSU College of Medicine through the early decision process.*

# GET A HEAD START ON *YOUR* MEDICAL *EDUCATION*

## Admission to the Honors Medical Scholars Program

The strongest applicants to the Honors Medical Scholars Program will have a record of high academic ability, a heart for service, and a sincere concern for vulnerable populations. Exposure and experience in health care and health-related settings is recommended.
