The College of Medicine Summer Research Fellowship program allows for medical students to participate in research, with the assistance of a faculty mentor. Medical students wishing to participate in the Summer Research Fellowship program are required to submit a research proposal in order to be considered for a $2,500 award.

If you are interested in applying, we strongly encourage you to begin by reaching out to faculty within your area of research interest to identify a mentor. To apply, write a proposal of no more than four pages with assistance from the faculty mentor you have identified.

A partial list of research opportunities as well as information regarding proposal components and the submission process are posted on the College of Medicine website at Medical Student Funding Resources. Hard copies of this information are also available in the Division of Research, Graduate & Undergraduate Programs, MSB Suite G117.

The proposal must contain:
1. A brief description of the proposed research (research goals to be accomplished in the fellowship period.)
2. A statement of how this opportunity will help the student meet their goals.
3. A copy of the faculty member’s curriculum vita.

Research proposals are due by 5:00 p.m. on Friday, March 28, 2014. You may email your proposal to research@med.fsu.edu or deliver it to the Division of Research, Graduate & Undergraduate Programs, MSB Suite G117. Students selected to receive fellowships will be notified approximately three weeks later.

If you are interested in other student research opportunities see the Student Research Opportunities link found at the College of Medicine, Division of Research website.

Please contact Sara Shaw in the Division of Research, Graduate & Undergraduate Programs at 645-7341 or sara.shaw@med.fsu.edu if you have other questions.
