Course #	Name	Credits	Description	Prerequisites	Department Offering Course	University Requirements	Misc Information
IDS 3493	Empowering Health Consumers in the eHealth Era (Formerly taught under IFS3037)	3	This course explores the use of emerging technologies for health information seeking, health promotion and disease prevention, and for supporting the treatment and management of chronic illnesses. Students learn how to assess users' information needs, competencies, and health behaviors in order to develop accessible, useful, and effective solutions. They also study issues and concerns influencing adoption of these technologies at different levels.		Information	E-Series, SIP, "W"	NOTE: This course can substitute for LIS 4772 Intro to Consumer Health Informatics for those pursuing a Certificate in Health Information Technology.
LIS 4772	Introduction to Consumer Health Informatics	3	This course explores the design and use of emerging technologies for health promotion and disease prevention, and for supporting the treatment and management of chronic illnesses. It promotes an interdisciplinary and user-centered approach for developing applications for health consumers. Students learn how to assess user's information needs, competencies, and health behaviors in order to develop accessible and effective solution. They also study issues and concerns influencing adoption of these technologies at different levels.		Library & Information Studies		NOTE: This course is most often taught as IDS 3493 Empowering Health Consumers in the eHealth Era
LIS 4776	Advanced Health Informatics	3	This course builds and extends the foundations presented in LIS 4785, while introducing practical solutions for the health IT professional. Students apply IT knowledge to address real-life problems in the medical community. The course provides students with a solid practical set of skills to enter the health industry.	LIS 4785	Library & Information Studies		
LIS 4785	Introduction to Health Informatics	3	This course presents how theory and practice in health care, strategy, information technology, communications, and law are integrated in the management and delivery of health care in various situations. Focus is on the emerging specialization in the health-care industry that combines expertise in health care, information technology, and information management.		Library & Information Studies		Fall
NUR 3076	Communication in Health Care	3	This course examines various communication patterns basic to individual and group relationships. Course emphasizes the development of interactive skills paramount to effective communication with individuals and groups involved with health care issues. It provides an opportunity for the validation of oral communication and a range of public speaking experiences especially related to health care.	ENC 1101	Nursing	Oral Communication Competency	Fall, Summer To request enrollment in this course please email IMSadvising@med.fsu.edu
