Age-Friendly Healthcare in a COVID-19 World

SEPTEMBER 25, 2020 | ALL-DAY VIRTUAL SYMPOSIUM

8:00 am - 3:45 pm

Presented by Geriatrics Workforce Enhancement Programs at Florida State and Nova Southeastern Universities

Free with fees for Continuing Education

Symposium Objectives

Age-friendly healthcare involves using evidence-based practice and awareness of what matters most to individuals in every care interaction. It operates within the 4M's framework:

Medication, Mentation, Mobility, and What Matters Most

The framework, however, has had to adapt to the recent global coronavirus pandemic. This online symposium will host experts in each of the 4M's who will discuss how to continue to offer age-friendly care in the wake of COVID-19. Then two panels of those serving older adults on the front lines will provide interactive sessions on community dementia resources and overcoming challenges of COVID-19 management in older adults in multiple settings.
