

## **CenteringPregnancy®: Supporting Patients, Uplifting Providers**

Tanya Evers, M.D.

Technological advances continue to expand and improve patient care around the world in medicine. We are accustomed to EMRs, prior authorizations, billing, and the many ways in which days can be made hectic in the clinic and hospital settings. However, sometimes, the simple act of sitting and talking can not only provide patients with the care they seek but offer solace to the providers offering that care. During this session, we will look at CenteringPregnancy® and the positive outcomes for moms and babies, while also taking a deeper look at how providers can benefit from offering this model of OB care to their patients.
