	Begin class QI project. Protected research time 5% - may advance in upper years	20 - 50% Psychotherapy modalities. Caseload cant exceed more than 20% child/adolescents	Services will allow resident flexibility to see continuity outpatients typically during afternoons.	Services will allow resident flexibility to see continuity outpatients typically during afternoons

Abbreviations: FM: Family Medicine IM: Internal Medicine C/L: Consultation-Liaison

Note: All PGY1 residents will be on the same service in their first month of residency for a “crash course” in psychiatry. This time will feature added didactics towards learning the basics of being a resident, psychiatric assessment/treatment, and building familiarity with local systems. Clinical load will be reduced to allow for the additional instruction.
