## Interdisciplinary Medical Sciences (IMS) Program

### Health Management, Policy, & Information Major Course Requirements

The Florida State University College of Medicine's goal is to educate and develop exemplary physicians who practice patient-centered health care, discover and advance knowledge, and are responsive to community needs. The IMS Program expands and develops the solid science foundation needed to apply to medical school, dental school, physician assistant programs, and to pursue careers in a number of other health care professions that require post-baccalaureate training.

The Health Management, Policy, & Information major prepares students to understand administration and management in private and public health care organizations, formulate and implement health care policies, analyze health care services, or learn about health informatics to improve the quality and safety of patient care services and programs.

IMS students earn a B.S. degree in Biomedical Sciences.
