Overview

Course Goals

Host-Defense is the first course of the Human Systems in Health and Disease course sequence -- a study of the human functional systems that builds on the structure and function knowledge acquired in Foundations of Medicine 1: Organization and Structure and Foundations of Medicine 2: Molecules to Mechanisms. Host-Defense prepares students to study health and disease in specific systems through mastery of fundamental knowledge of the structure, function and diseases of the immune system, of infectious pathogens and processes, and of the two most basic mechanisms of human disease: inflammation and cancer. The course emphasizes concepts and integrates knowledge from traditional disciplines such as biochemistry, cell biology, histology, immunology, microbiology, pathology, pharmacology, and physiology in the context of clinical application. COM mission-based domains are underscored in specific objectives that address important host-defense issues in geriatric, rural and other underserved populations, such as the blunted immune response to vaccines in elderly patients. Concepts and knowledge acquired in Host-Defense are expanded in later courses. For example, the various functions of the white blood cells are presented in Host-Defense, and the pathobiology of these cells is further elaborated during the final systems block, Hematologic System. Knowledge of the underlying science is used to explain the clinical findings of inflammation, infection and cancer. In a similar way, students learn how to interpret the results of fundamental laboratory tests used to diagnose inflammatory, infectious, neoplastic and immune diseases. Students also begin to learn how to select appropriate additional tests in a cost-effective and evidence-based approach. Curricular themes such as cultural issues, ethics, and public health are developed as essential components in case studies – for example, attitudes, choice and personal vs community consequences of decisions related to vaccination – and in clinical encounters with standardized patients. Students completing Host-Defense will understand the structure and function of the immune system in health and disease and its impact on individuals, families, society, and the health care system. They will develop a strong appreciation of how immune cells can protect the host from infection and cancer, and how immunosuppression predisposes to it to these diseases. Students will also learn how, during the course of chronic inflammatory diseases, immune cells may cause collateral damage to the host and how the influence of tumor cells on immune cells may allow them to spread throughout the body. The block additionally covers the basics of pathogenicity of microbes and the drugs used to suppress immune responses (immunosuppressive) and treat infection (antibiotic), inflammation (anti-inflammatory) or cancer (antineoplastic). Mastery of these concepts will enable students to understand the pathogenesis of the most common groups of human diseases: infectious, inflammatory and neoplastic diseases as they impact the systems studied in the remaining blocks of Human Systems in Health and Disease sequence.

<th>Means of Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Compare and contrast the structures and functions of the immune system cells and organs and describe the mechanisms of pathogenesis of autoimmune, infectious and non-infectious inflammatory diseases, the mechanisms that control genomic integrity and cell growth and its failure during carcinogenesis and metastases</td>
<td>2.2, 2.3</td>
<td>Quizzes and Exams</td>
</tr>
<tr>
<td>2. Describe cell responses to stress and injury, the mechanisms of reversible and irreversible cell adaptation, necrosis, and apoptosis, and the mechanisms and components of tissue repair and regeneration</td>
<td>2.2</td>
<td>Quizzes and Exams</td>
</tr>
<tr>
<td>3. Identify, describe and distinguish tissue and cell types using photomicrographs and by virtual microscopy</td>
<td>2.2</td>
<td>Quizzes and exams</td>
</tr>
<tr>
<td>4. Compare and contrast the features and classification of benign and malignant neoplasms</td>
<td>2.2, 2.3</td>
<td>Quizzes and Exams</td>
</tr>
<tr>
<td>5. Describe the mechanisms, targets, and clinical effects of drugs used to treat infectious, inflammatory, autoimmune and neoplastic diseases, including vaccines and their relationship to public and population health</td>
<td>2.2, 2.3, 2.4, 2.5</td>
<td>Quizzes and Exams; ICS assignment</td>
</tr>
<tr>
<td>6. Explain the physiological and psychosocial aspects of disease</td>
<td>2.1, 2.2,</td>
<td>Quizzes and Exam; Observation by faculty;</td>
</tr>
<tr>
<td>Objective</td>
<td>Competencies</td>
<td>Methods</td>
</tr>
<tr>
<td>--------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------</td>
</tr>
<tr>
<td>1. Demonstrate basic physical properties and imaging characteristics of</td>
<td>1.1, 1.2, 1.4, 2.1, 2.3</td>
<td>Observation by faculty in CLC and small groups, SonoSim modules</td>
</tr>
<tr>
<td>ultrasound, and identify opportunities, advantages, and limitations for its point-of-care use</td>
<td>1.1, 1.2, 1.4, 2.1, 2.3</td>
<td>Observation by faculty in CLC and small groups, SonoSim modules</td>
</tr>
<tr>
<td>2. Identify social, behavioral, environmental and epidemiologic issues related to infectious, inflammatory and autoimmune disease and cancer, and that may impact care of patients, and describe their appropriate identification, prevention and management, including pharmacologic and non-pharmacologic approaches</td>
<td>2.2, 2.3, 2.4, 2.5</td>
<td>Senior Mentor Program; Quizzes and Exams; Observation by faculty in small groups</td>
</tr>
<tr>
<td>3. Demonstrate effective communication with patients including culturally and linguistically appropriate interviewing skills, and culturally appropriate verbal and non-verbal behaviors that promote building rapport and trust, and accurate and appropriate vocabulary and concepts</td>
<td>2.2, 2.3, 4.1, 5.5</td>
<td>Senior Mentor Program; Observation by faculty, staff, and standardized patients</td>
</tr>
<tr>
<td>4. Demonstrate the ability to organize and conduct a medical encounter by eliciting an accurate patient-centered medical history and physical exam to support clinical reasoning and application of principles of point-of-care testing and minimally invasive procedures</td>
<td>1.2, 1.3, 5.1, 5.5</td>
<td>Observation by faculty and staff</td>
</tr>
<tr>
<td>5. Demonstrate professional values, attitudes and behaviors in all interactions with faculty, staff, peers and patients.</td>
<td>1.7, 5.1, 5.3, 5.4, 5.5</td>
<td>Observation by faculty, staff, and peers; ICS assignment; tracking of required activities</td>
</tr>
<tr>
<td>6. Demonstrate the elements of informed consent, confidentiality and decision making and its place in medical ethics</td>
<td>1.3, 1.5, 5.3, 5.4, 5.6</td>
<td>Small group exercise, CLC</td>
</tr>
<tr>
<td>7. Demonstrate understanding and engage with respect in the unique roles/responsibilities and expertise of other health professions.</td>
<td>7.2, 7.3</td>
<td>ICS assignments</td>
</tr>
<tr>
<td>8. Demonstrate awareness of and concern for older adults, minority, rural and underserved persons while applying principles of epidemiological sciences to identify common health problems and disease</td>
<td>2.4, 5.5, 9.1</td>
<td>Senior Mentor Program, small group participation</td>
</tr>
</tbody>
</table>
Detailed learning objectives are provided for each session in the course.

**Course Format**

Host-Defense emphasizes engaged and active learning through a variety of individual, interactive large group, and case-based small group learning activities as well as standardized patient encounters in the Clinical Learning Center. Formative on-line assessment materials emphasize the development of thinking skills through analysis of data and cases, including biostatistics and epidemiology and NBME/USMLE-type questions. Students are expected to self-assess their learning needs and set goals to address them with the aid of faculty and their learning groups.

**Large Group Sessions (1200)**

Formal lectures are limited in favor of interactive large group sessions. This learner-centered model uses the principles of active and “flipped” learning. Pre-class preparation by students allows large group time to be spent in active discussion and consolidation of learning that takes maximum advantage of faculty expertise in application exercises and other instruction methodologies. Pre-class preparation assignments prime students for learning with basic didactic material presented through a variety of materials including interactive modules, self-assessment exercises, video and PowerPoint presentations, and textbook and journal readings. Interactive large group sessions apply and extend that knowledge through clinical case-based inquiry. Success depends on student engagement, preparation, and trust in the safe environment we maintain to encourage students to be curious and even to take intellectual risks. **The emphasis is on developing integrated basic and behavioral science concepts in a clinical context.** Whenever possible, real patients will be present to share their stories and demonstrate signs of their disease. Whenever patients are present, we ask that students wear their white coats and close their computers and other mobile devices as demonstration of respect for these wonderful patients who are willing to help us learn.

**Small Group Sessions (LCs, attendance required)**

Small group exercises are case- and/or problem-oriented. Some sessions pattern thinking through progressive disclosure, others focus on concept development through engaged engagement with data, while others employ the Jigsaw paradigm to focus on discovering similarities and differences of presentations or aspects of disease – the basis of differential diagnosis. Small group exercises are designed for engaged and active learning and emphasize reasoning, hypothesis formation, and hypothesis testing. The groups evaluate cases in terms of stated objectives and define additional learning objectives they will need to resolve. In Jigsaw exercises each small group (5-6) of students is assigned a case presentation to discuss and form an hypothesis. Typical questions to be resolved may include: What explains the presentation? What may be the cause? What more do we need or want to know? How do we acquire and interpret needed information? What are the options/priorities for treatment and management? Then the small groups re-mix such that each member of each new group “owns” a different case or aspect of a case, which he/she then “teaches” to the new group. In all small group exercises, all members of the group share responsibility for analyzing and explaining the clinical presentations. The value of small group exercises is not always the “answer,” but the reasoning behind it. Basic and clinical science faculty will be present to ask helpful questions if your group is “stuck” and to encourage your curiosity. During small group exercises, you are free to use any resources (unless otherwise instructed). At the end of each small group exercise, you will be expected to review the complete cases and create a summary in your own words of the “take home” points of the cases considered as a group. **Summarizing and paraphrasing in your own words is a powerful learning tool.**

**Clinical Learning Sessions (CLC) (attendance required)**

Throughout the block learners will continue to develop their clinical skills and clinical reasoning during individual or paired SP encounters in the CLC. These encounters will not be restricted to the exam maneuvers or problems associated with the specific system being studied in the block. They will often include reviews of prior organ systems and demonstrations of how systems intersect and impact one another.
**Interprofessional Collaborative Skills (ICS) Assignment: The Consultative Process**

Medical students will be assigned to interprofessional teams which will include another medical student and/or PA student and a PharmD student from FAMU. All ICS assignments, templates, links and submissions are through the Class of 2025 Interprofessional Collaborative Skills course site on Canvas. You must accept the invitation to this course – which you will use for 2 years.

The Consultative Process: Pharmacy consult module is comprised of 4 components.

1. Each medical student pair or MD/PA student pair will formulate questions and concerns related to medication use, based on analysis of a virtual patient case and share that list with their PharmD Team mate on Canvas. The PharmD student will independently create and share a similar list.
2. Using the Canvas Discussion board the Team will compare and contrast their perspectives and approaches to the patient and concerns.
3. Based on that discussion, the Team will compose and submit a collaborative summary synthesizing the medical and pharmacy perspectives for faculty feedback.
4. Each medical student will then submit a brief reflection on what they learned about the different approaches and perspectives of the different professions, and will share those insights with their clinical skills small group. Written feedback will be provided by small group facilitators.

**PICO Assignment**

PICO is a format physicians can use for converting clinical scenarios to researchable and answerable questions to provide evidence-based care of patients. This format can be used to answer questions about treatment, diagnosis, risk factors, etiology, statistics and phenomena.

- P = Patient, Population and/or Problem
- I = Intervention, treatment, Prognostic factor, and/or Exposure (Which specific are you considering?)
- C = Comparison and/or Control (What is the main alternative to the above?)
- O = Outcome (What are you trying to accomplish, improve, or effect?)

Initial information about the PICO format was covered during Foundations of Medicine 2. During the Host-Defense block each student will develop a clinically relevant question, framed using the PICO format and submit the assignment via Canvas no later than 5:00 pm, Friday, December 3rd.

**Critical Reading/Critical Analysis of Literature Assignment (aka Journal Club)**

Each course in the fall and spring semesters of the pre-clerkship curriculum includes one or more large or small group sessions related to the interpretation of primary literature. Prior to each of these required sessions, each student reads the assigned paper and completes and submits the guided reading template posted on Canvas. This guided reading template – which reflects the organization of the *New England Journal of Medicine* Quick Takes format – helps develop student skills that are critical for interpreting primary literature necessary for practicing Evidence-based Medicine and for keeping up with important biomedical research. Completion of the template by all students prior to the session assures readiness for meaningful in-class analysis and discussion.

At least once each semester, the Journal Club will take place in small groups. When scheduled as a small group, individual students will be assigned to lead the discussion, and all students will be assessed on their preparation and participation.

**CITI training modules (Collaborative Institutional Training Initiative: Protection of human subjects in research)**

Time is reserved in the curriculum throughout the course for students to complete on-line training in the history, ethics and responsible conduct of human research. Completion of the Human Subjects Research (HSR) Biomedical/Clinical modules is mandatory for all students. The training is completed on-line at times of your choice. All required modules must be completed and the certificate of completion uploaded to Canvas no later than 3 PM, Thursday, December 9th. Whether or not you will do research while a medical student or during your residency, an understanding of the scientific and ethical principles of clinical and translational research is essential to all physicians and is an LCME required element of a general medical education (LCME Element 7.3). Information and directions for accessing the modules can be found on the FSU Human Subjects Research page. You will receive additional information about this learning activity from your course directors during the course.

**Senior Mentor Program (Zoom virtual home visits; participation required)**

Through participation in the Senior Mentors Home Visits Program, students learn about the biopsychosocial perspective of aging and develop skills in active listening and history taking. The activities and assignments of the Program occur throughout the Fall semester of Year 1 and contribute to the grade of both Fall courses: Foundations of Medicine 2: Molecules to Mechanisms and Host-Defense. The Senior Mentor Program pairs two (2) students with an independently-living older person in the community. Working as a team, the students visit with the assigned Senior Mentor 3 times during the semester. For AY2021-2021, these visits will all be remote, acknowledging that this population continues to be
among those most at risk for COVID-19 variants. Each visit is associated with a set of objectives that develop an understanding of the importance of knowing a patient first as a person and how information on background, education, work history, belief systems, values, and personal needs contributes to that understanding. Following each visit, both team members complete and submit the appropriate assignment form. Completed assignments are discussed in small groups. Students are responsible to schedule their visits with their Senior Mentors to allow adequate time to complete and submit these written assignments no later than 5:00 PM on the following due dates: 9/24, 10/22 and 11/23. The appropriate assignment forms are found on Canvas (the University Learning Management System). Note, the second and third Senior Mentor assignments are due during Host-Defense.

**Professionalism**

Medicine is a Profession, which means it entails unique responsibilities and obligations as well as unique privileges. "Professional identity formation" is an objective as important as learning the sounds and anatomy of the heart, but requires a different set of learning skills. Important among those are integrity, reflection, self- and peer assessment, deliberate practice, and learning for mastery (not grades).

Two essential Professional behaviors that will become a part of your everyday life are founded on respect for patients:

**Confidentiality:**

Patients — including Standardized Patients— deserve to be treated with respect. Respect for patients includes keeping all patient information confidential. Patient information may be shared with other health care professionals that have a legitimate, professional “need to know,” or with specific family members, friends, or others that have permission from the patient for access to the information.

Be especially conscious about discussions of patients in public places. Even when patient names are not used, the discussion may reveal the patient’s identity to others who overhear the discussion. Rather than risk a violation of patient confidentiality, discuss patients only in a private setting and only with individuals who have a legitimate need to know.

Be careful to keep all patient notes, reports and materials confidential. Patient records, should be returned to faculty, destroyed, or kept in a secure place.

Similarly, your classmates deserve to be treated with respect. Information learned about your classmates and their families while in class is considered confidential. You are not free to disclose this material to others without the specific consent of the person.

Violation of confidentiality may result in a Report of Concern for Unprofessional Behavior and may be referred to the Student Evaluation and Promotion Committee (SEPC). Egregious unprofessional behavior of any variety may result in suspension of the student, a failing grade for the course, and/or referral to SEPC.

**Professional Attire:**

Medical students, faculty and staff are all ambassadors and representatives of the College of Medicine and of the medical profession. Appearance and behavior should at all times demonstrate respect for the profession and for our patients. The needs of patients must always come first, and any barriers to meeting those needs (including attire, appearance and grooming) must be removed.

Professional attire should be worn in settings where students interact with people from outside the COM, and particularly when interacting with Standardized Patients (SPs) in the CLC, on a “house visit,” or when in a preceptor's office or clinic, a hospital or nursing facility. Professional attire should also be worn when patients, guests, or visitors are present in large or small group sessions.

Specific standards for professional attire are detailed at the end of this document and can always be found on the course Canvas site.

**Course Content**

**Content sequence in Host-Defense:**

Throughout the block, continued development of clinical reasoning and clinical skills focuses on advanced history taking, advanced physical exam maneuvers, and the interpretation of common diagnostic tests relevant to these systems. Standardized patient interactions continue with emphasis on clinical reasoning skills using problem oriented and chronic disease encounters that are not limited to block-specific content.

**Basic Immunology**

- Immune cells and organs; structure and function
• Immune responses: Innate and Adaptive Immune Responses
• Interpretation of lab tests to assess immune function

**Immunopathology** (Diseases of the Immune System)
• Immunodeficiency
• Immune tolerance and Autoimmunity
• Inflammation
• Infection

**Infectious Diseases and Microbiology**
• Introduction to infectious diseases
• Pathophysiology of infection
• Molecular basis of pathogenesis
• Oncogenic viruses
• Epidemiology
• Vaccination

**Cancer**
• Tumor Invasion and Metastasis
• Tumor immunology
• Clinical aspects of cancer

**Biomedical Ethics**

**Evidence-based Medicine**

**Required Materials (All required texts are available as ebooks through COM library page)**

- OnlineMedEd – Individual subscription provided by the COM (login with your COM email address)
- *Basic and Clinical Pharmacology* (Katzung)
- *Bates Guide to Physical Examination and History Taking*
- *Behavioral Science in Medicine* (Fadem)
- *Histology: A Text and Atlas With Correlated Cell and Molecular Biology* (Ross)
- *How the Immune System Works* (Sompayrac)
- *Physiology* (Costanzo)
- *Resolving Ethical Dilemmas: A Guide for Clinicians* (Lo)
- *Robbins and Cotran Pathologic Basis of Disease* (Kumar)
- *Sherris Medical Microbiology* (Ryan)
- *Smith’s Patient-Centered Interviewing: An Evidence-Based Method* (Fortin)

**Additional required readings** will be assigned from a variety of sources. These readings will be provided to you and posted on Canvas when possible.

Additional materials **required** for clinical sessions

a. Clinical examination equipment: Each student must purchase and/or have available the following clinical examination equipment: stethoscope with diaphragm, bell and pediatric option, oto/ophthalmoscope, #128 and #512 tuning forks, penlight, reflex hammer, Rosenbaum eye chart and a sphygmomanometer with pediatric, adult, and large adult sized cuffs. Opportunities to purchase this equipment at a discount will be provided prior to orientation. Bring your examination equipment with you to each CLC session.

b. Also bring the following to each session in the CLC:
   • A watch capable of measuring seconds
   • A pen for writing (blue or black ink)
   • The student’s personal mobile device loaded with the appropriate medical software/applications.
**Assessment Methods**

**Examinations**
There will be a mid-block assessment and a final assessment. The midblock assessment contributes 40% and the final assessment 60% to the final average. Each assessment will be comprised of questions from the NBME (National Board of Medical Examiners) question bank. The questions on this customized NBME exam will be selected by course faculty as appropriate assessment of course objectives. Formative faculty-written quizzes and/or other assessment exercises will be required throughout the block.

**Written exams**
Multiple choice and other question formats are used to assess both content knowledge and application skill (ability to solve problems, demonstration of clinical reasoning, interpretation of images and laboratory results, etc.) on written exams. Exam questions may be drawn from or reinforce material presented in any activity or assignment, from assigned readings, and from CLC sessions. Exams are cumulative across the curriculum, i.e., main concepts, content and skills from material presented in prior courses may be included in questions.

Students must score a cumulative average of ≥70% on all exam questions to pass the written examination component of the course. Students with a written exam average below 70% risk failing **Host-Defense** and being referred to the Student Evaluation and Promotions Committee.

**Quizzes**
Throughout the course there will be weekly faculty-written quizzes, delivered on Canvas. These formative tools are “assessments for learning” that allow students to self-assess mastery of the material and learning needs. **Quizzes are required and must be completed each weekend prior to 8 AM the following Monday.** All quizzes are mandatory and must be completed without collaboration or consulting resources (e.g., textbooks, peers, notes, websites, etc.), consistent with the FSU and COM Honor Code. Quizzes are important opportunities for students to practice the self-assessment and responsibility for their own learning that are part of Professionalism and Practice Based Learning and Improvement. The results of the quizzes will be tracked as a measure of your progress (see Specifications Grading below) and to help faculty provide students with guidance that will help them succeed in the curriculum.

**Clinical skills exams**
Formative and summative assessment of clinical skills occurs periodically throughout the pre-clerkship phase. OSCEs are skills-based examinations conducted in the CLC to assess the student’s ability to demonstrate clinical skills and behaviors. OSCEs typically consist of several “stations.” Each station will require the student to demonstrate one or more clinical skills/behaviors that will be assessed by a trained observer using established performance criteria for that assessment. The OSCE will provide students with feedback on their ability to perform an organized medical interview.

Students must score ≥ 80% on the OSCE in order to pass the course in which the OSCE occurs. Students who do not achieve a score of 80% or higher on the OSCE must remediate these clinical skills. **An OSCE is part of the final assessment for Host-Defense. It will emphasize the medical interview and history. Students scoring below 80% who are unable to successfully remediate these deficits will receive a grade of “Fail” for Host-Defense and be referred to the Student Evaluation and Promotions Committee.**

**Specifications Grading**
The FSU COM has adopted a pass/fail grading system, which is used in the curriculum for the first and second years (See Student Handbook). To achieve a grade of Pass in BMS 6041 (**Host-Defense**) a student must earn **a minimum of 206 points as described in the table below**, including a minimum of 120 points from the assessment categories and 2 points for pre-class preparation. The final grade of a student who accumulates 206 total points but has not achieved the minimum required number of points in any non-assessment category will be at the discretion of the course directors following discussion and any required remedial action.

**TOTAL NON-ASSESSMENT** 86 101
**TOTAL** 206 245

For your convenience – here is a table of the due date and time for all assignment submissions. **MARK YOUR CALENDARS.**

### Notes:
1. An exam score is the combined results of the midblock and final NBME exams, with each question carrying equal weight. An end of course exam average between 70% and 74.9% (90 points) is considered a “marginal” pass. Students in this category are encouraged to consult the academic counselors in Student Affairs as well as the course faculty for advice on study and test-taking skills. An end of course exam average < 70% (0 points) will receive a grade of fail* (see Grading Policy below), which will require remediation or repetition of the course, as proposed by the course directors and determined by decision of the Student Evaluation and Promotion Committee.

2. A student whose performance is <70% (below passing) on any individual exam (see above for definition of exam score) during the course is required to
   a. Contact the course directors within 24 hours and
   b. Meet with the course directors. Students may be asked to complete a Performance Improvement Program, the purpose of which is to assist the student in developing the skills and habits necessary to succeed in the curriculum as well as to address specific performance deficits.

3. Any quiz not completed by the Monday 8 AM deadline will earn 0 points. Any quiz submitted >24 hours late will result in a 2 point deduction from the quiz category points.

4. Attendance and satisfactory participation are required in all small group sessions, all activities scheduled in the CLC, assigned labs, and other activities as determined by the course directors. Unexcused absence from an activity for which attendance is required may require remediation as determined by the course directors. Multiple unexcused absences from and/or late arrivals to required activities will be considered a Professionalism concern and may result in a Report of Concern for Unprofessional Behavior and referral of the student to the Student Evaluation and Promotions Committee in addition to loss of associated points.
5. Demonstration of the attitudes and behaviors of Medical Professionalism is expected at all times and in all aspects of the course, including adherence to the Honor Code when taking unproctored quizzes, adherence to COVID-19-related safety protocols and behaviors, and observation of the dress code. Professionalism concerns may generate a Report of Concern for Unprofessional Behavior.

6. A score $\geq 80\%$ on the Host-Defense OSCE is required to pass the course. A score of $\geq 80\%$ on the original assessment earns 20 points. Students who score $<80\%$ but successfully remediate the performance prior to the last day of the course earn 16 points. Students who are unable to successfully remediate will earn 0 points and receive a grade of fail for Host-Defense (see Grading Policy below), and will be referred to the Student Evaluation and Promotion Committee.

7. Satisfactory completion and timely submission of all assignments including Senior Mentor home visits and assignments and Interprofessional Collaborative Skills assignments, as determined by the course directors.

**Pre-clerkship course grading policy – Year 1:**

**Course written exam score:**
All quizzes are mandatory and must be completed without collaboration or consulting resources (e.g., textbooks, peers, notes, websites, etc.).

**Course grade:**
If the course average is $<70\%$, a grade of IR will be recorded.
- For an M1 course, a student may attempt to remediate the grade during the summer, if approved by the Student Evaluation and Promotion Committee (SEPC). Remediation will be comprised of a modified course, as proposed by the course directors, and passing performance ($\geq 70\%$) on a customized NBME exam. The grade will convert to Pass or Fail at the end of the remediation block.
- If a student has IR grades in 2 or more M1 courses and the SEPC decision recommends repeating year 1, the IR grades will convert to Fail.

In courses that include an OSCE:
- OSCE score < 80%, if the course written exam score is Pass OR IR (see above) = IR

In courses that include Preceptorship (M1 Spring, M2 Fall)
- Unsatisfactory performance in Preceptorship, if the course written exam score is Pass OR IR = IR

Unsatisfactory Professionalism, if the course written exam score is Pass OR IR = IR or Fail depending on the nature of the Professionalism concern, as determined by the SEPC.

In any course in which the student’s performance merits a grade of IR in 2 or more of the above categories (written exam score, OSCE, Preceptorship, Professionalism), the student will be referred to the SEPC, and a grade of Fail may be awarded, as determined by the SEPC.

**Pre-clerkship course remediation policy – Year 1:**

A student who has completed all the assessments and activities of a course and has not achieved a grade of Pass (see above), will be required to repeat the entire content of the course and demonstrate competence through an assessment which is consistent with the original course. Remediation activities, including final testing, may involve other students.

**Remediation should be comprised of a specific plan for learning and assessment such as the following:**
- Review of course content available on Canvas
- Review of content through OnlineMedEd and Canvas, identifying topics to be covered each week
- Completion of weekly quizzes and practice test
- When a specific deficit is identified (e.g., pharmacology), completion of assignments determined by relevant content experts (e.g., paraphrasing, problem sets, case application, etc.)
- Weekly meetings with course directors and other faculty content experts as determined by the course directors to verify active engagement with content that is resulting in improved learning.
- A passing score ($\geq 70\%$) on a customized NBME exam (questions selected by the course directors and with a difficulty approximately equivalent to final exam average of the course) and additional faculty-written questions, if determined to be necessary by the course directors.

A student who scores $< 70\%$ on the final assessment or does not adequately engage in the remediation process (as monitored by the course directors) will receive a grade of Fail for the course.

**Course Evaluation**

Students will have the opportunity to provide constructive feedback through evaluation forms. Evaluations will include both content and facilitation/teaching. Feedback is encouraged at all times on all components of the course and will assist the course directors in providing a timely continuous quality improvement.
Americans with Disabilities Act

Florida State University (FSU) values diversity and inclusion; we are committed to a climate of mutual respect and full participation. Our goal is to create learning environments that are usable, equitable, inclusive, and welcoming. FSU is committed to providing reasonable accommodations for all persons with disabilities in a manner that is consistent with academic standards of the course while empowering the student to meet integral requirements of the course. Candidates for the M.D. degree must be able to fully and promptly perform the essential functions in each of the following categories: Observation, Communication, Motor, Intellectual, and Behavioral/Social. However, it is recognized that degrees of ability vary widely between individuals. Individuals are encouraged to discuss their disabilities with the College of Medicine’s Director of Student Counseling Services and the FSU Office of Accessibility Services to determine whether they might be eligible to receive accommodations needed in order to train and function effectively as a physician.

The Office of Student Counseling Services
Medical Science Research Building, 2301
Phone: (850) 645-8256 Fax: (850) 645-9452

To receive academic accommodations, a student:

1) must register with and provide documentation to the Office of Accessibility Services (OAS);
2) must provide a letter from OAS to the instructor indicating the need for accommodation and what type; and
3) should communicate with the instructor, as needed, to discuss recommended accommodations. A request for a meeting may be initiated by the student or the instructor.

Please note that instructors are not allowed to provide classroom accommodations to a student until appropriate verification from the Office of Accessibility Services has been provided.

This syllabus and other class materials are available in alternative format upon request. For more information about services available to FSU students with disabilities, contact the:

Office of Accessibility Services
874 Traditions Way
108 Student Services Building
Florida State University
Tallahassee, FL 32306-4167
Voice: (850) 644-9566 TDD: (850) 644-8504
oas@fsu.edu https://dsst.fsu.edu/oas

Academic Honor Code

The Florida State University Academic Honor Policy outlines the University's expectations for the integrity of students' academic work, the procedures for resolving alleged violations of those expectations, and the rights and responsibilities of students and faculty members throughout the process. Students are responsible for reading the Academic Honor Policy and for living up to their pledge to "...be honest and truthful and...[to] strive for personal and institutional integrity at Florida State University." (Florida State University Academic Honor Policy, found at http://fda.fsu.edu/Academics/Academic-Honor-Policy)

Attendance Policy

University Attendance Policy:
Excused absences include documented illness, deaths in the family and other documented crises, call to active military duty or jury duty, religious holy days, and official University activities. These absences will be accommodated in a way that does not arbitrarily penalize students who have a valid excuse. Consideration will also be given to students whose dependent children experience serious illness.

The College of Medicine has detailed attendance policies as they relate to each cohort and events that conflict with course schedules. See FSUCOM Student Handbook for details of attendance policy, notice of absences and remediation.

Unexcused absence from a scheduled examination or quiz may result in a score of zero (0 %) being assigned for that assessment. Unexcused absence from an activity for which attendance is required (for example, Small Group session) may be considered as an issue of Professionalism. Any unexcused absence may require completion of the Performance Improvement Plan (see Grading section, above).
Clinical Learning Center (CLC) Specific Absence Policy

**CLC scheduled activities**

Students with a legitimate reason to miss a scheduled session in the CLC must request an approved absence through Student Affairs through the [online link](#). Students with approved absences will be allowed to reschedule or participate in a make-up session. Unapproved absences may not be rescheduled or made up. Repeated unapproved absences may result in a failing grade for the course and a [Report of Concern for Unprofessional Behavior](#).

If you know you will be absent from a scheduled CLC session, please complete the absence approval request at least two weeks in advance. For absences that are approved at least two weeks in advance, a change in CLC schedule assignment will be arranged.

One method for addressing a planned and approved absence is to identify a classmate willing to exchange scheduled sessions with you. In this situation, both students (the student with the approved absence and the willing classmate) should send a request via email to the CLC Team at least two weeks in advance. Students will be notified re: approval of these requests. Please note: Sending a request is NOT equivalent to receiving approval.

Unplanned but excusable absences from CLC sessions are absences due to circumstances beyond the student’s control. Examples include student illness and/or family death. When such a situation occurs, please contact the CLC Team as soon as possible, to inform them that you will not be present. Then, submit an absence request to Student Affairs through the [online link](#). Student Affairs will classify the absence as excused or unexcused.

If the absence qualifies as an “excused” absence, the student must contact the CLC Team to develop a plan to make up the missed session. These sessions may require the presence of an SP and/or CLC faculty member. Any excused absence will not impact the student’s grade.

Unexcused absences generally involve circumstances within the student’s control. Examples of unexcused absences include the student who forgets about a scheduled CLC session, the student who skips the session to study, and/or any absence where an able student fails to contact Student Affairs and the CLC Team to inform them that the student will not be present for the session.

If the absence is unexcused, the clinical skills director will discuss the situation with the student. Any further unexcused absences will result in the notification of Student Affairs, a [Report of Concern for Unprofessional Behavior](#), and referral of the student to the Student Evaluation and Promotions Committee. Students with unexcused absence(s) will still be responsible for the missed material in future OSCE's and written examinations.

**Objective Structured Clinical Examination (OSCE)**

If a student knows he/she will not be able to participate in the formative OSCE, he/she should complete and submit the appropriate forms to Student Affairs, and, if within 24 hours of the time he/she is scheduled for the OSCE, contact the CLC Team. If the absence is excused by Student Affairs, the student will receive an “I” (incomplete) grade and be required to complete a make-up OSCE at a designated time after the course has ended.

Any excused absence—whether planned or unplanned—will not impact the student’s grade.

Any absence that does not qualify as an excused absence per Student Affairs is an unexcused absence. These generally are due to circumstances within the student’s control. Examples of unexcused absences include the student who forgets about an OSCE session, the student who skips an OSCE to study for an exam and/or any absence where an able student fails to follow the procedures above if they are not able to participate in the OSCE. An unexcused absence from the formative OSCE will result in a [Report of Concern for Unprofessional Behavior](#).
Professional Attire

Professional attire consists of clothes consistent with community norms for physicians. Length and fit of all attire is to be in accordance with that acceptable for physicians in a professional healthcare environment; oversized, undersized, tight-fitting, seductive, and/or revealing clothing is not acceptable.

Unacceptable attire includes, but is not limited to, the following: jeans of any style or color, denim material or "denim look" material, sheer or see-through fabrics, strapless, low-necked or exposed chest clothing, midriff-baring clothes, backless clothing, spaghetti straps, cut-offs, tank tops, halter tops, crop tops, tube tops, sun dresses, crop pants, shorts, pedal pushers, hip hugger pants, stirrup pants, any item constructed mainly of spandex, sweat suits (sweat pants/sweat shirts) warm-up suits, overalls, hats, and any clothing that advertises.

Examples of professional attire in Tallahassee are: slacks or skirt and a collared shirt or blouse or sweater; conservative length dress (dress or skirt edge should rise no higher than 2” above the top of the knee-cap (patella) during all clinical care and training maneuvers including sit down patient-clinician conversations; dress or skirt should not be tight fitting).

Ties may be either required or forbidden in some clinical situations.

Footwear may include dress or casual closed toe shoes (no sports shoes, no sandals, no open-toe footwear). Heels more than 3” in height are never appropriate in clinical settings.

Consult your supervisor to clarify expectations for student attire in any ambiguous or new situations.

**Professional appearance:** Long hair must be pulled back and secured. Facial hair must be neatly groomed. If possible, all tattoos should be covered by clothing. No visible body piercing except a single piercing in each ear. No large earrings or loose jewelry. Fingernails must be trimmed. If nail polish is worn, it should not be a distracting color. No strong perfume or other scented products. In compliance with OSHA regulations, closed-toed shoes are required in all clinical settings—including the CLC as well as the anatomy lab.

The established "norms" of certain clinical settings may modify these standards for professional attire, but any variations in professional attire must be approved by the student's supervisor. Consult your supervisor to clarify expectations for student attire in any ambiguous or new situations.

For curricular activities where guests or patients are not present: Unacceptable attire includes, but is not limited to, the following: sheer or see-through fabrics, strapless, low-necked or exposed chest clothing, midriff-baring clothes, backless clothing, spaghetti straps, cut-offs, tank tops, halter tops, crop tops, tube tops, or extremely short shorts.

</tr>
</tbody>
</table>
4.3 Work effectively with others as a member or leader of a health care team or other professional group

4.4 Act in a consultative role to other health professionals

4.5 Maintain comprehensive, timely, and legible medical records

4.6 Demonstrate sensitivity, honesty, and compassion in difficult conversations, including those about issues such as death, end-of-life, adverse events, bad news, disclosure of errors, and other sensitive topics.

4.7 Demonstrate insight and understanding about emotions and human responses to emotions that allow one to develop and manage interpersonal interactions

5 PROFESSIONALISM: Demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles

5.1 Demonstrate compassion, integrity, and respect for others

5.2 Demonstrate responsiveness to patient needs that supersedes self-interest

5.3 Demonstrate respect for patient privacy and autonomy

5.4 Demonstrate accountability to patients, society and the profession

5.5 Demonstrate sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation

5.6 Demonstrate a commitment to ethical principles pertaining to provision or withholding of care, confidentiality, informed consent, and business practices, including compliance with relevant laws, policies, and regulations

6 SYSTEMS-BASED PRACTICE: Demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care

6.1 Work effectively in various health care delivery settings and systems relevant to their clinical specialty

6.2 Coordinate patient care within the health care system relevant to their clinical specialty

6.3 Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care

6.4 Advocate for quality patient care and optimal patient care systems

6.5 Participate in identifying system errors and implementing potential systems solutions

6.6 Work in interprofessional teams to enhance patient safety and improve patient care quality

7 INTERPROFESSIONAL COLLABORATION: Demonstrate the ability to engage in an interprofessional team in a manner that optimizes safe, effective patient- and population-centered care

7.1 Work in cooperation with other professionals to establish and maintain a climate of respect, dignity, diversity, ethical integrity, and trust in order to enhance team functioning and serve the needs of patients, families, and populations

7.2 Utilize and enhance one's own expertise by understanding and engaging the unique and diverse knowledge, skills, and abilities of other professionals to enhance team performance and maximize the quality of patient care

7.3 Exchange relevant information effectively with patients, families, communities, and other health professionals in a respectful, responsive, and responsible manner, considering varied perspectives and ensuring common understanding of, agreement with, and adherence to care decisions for optimal outcomes

7.4 Participate in and engage other members of interprofessional patient care teams in the establishment, development, leadership, and continuous enhancement of the team in order to provide care that is safe, timely, efficient, effective, and equitable

8 PERSONAL AND PROFESSIONAL DEVELOPMENT: Demonstrate the qualities required to sustain lifelong personal and professional growth

8.1 Develop the ability to use self-awareness of knowledge, skills and emotional limitations to engage in appropriate help-seeking behaviors

8.2 Demonstrate healthy coping mechanisms to respond to stress

8.3 Manage conflict between personal and professional responsibilities

8.4 Practice flexibility and maturity in adjusting to change with the capacity to alter behavior

8.5 Demonstrate trustworthiness that makes colleagues feel secure when one is responsible for the care of patients

8.6 Provide leadership skills that enhance team functioning, the learning environment, and/or the health care delivery system

8.7 Demonstrate self-confidence that puts patients, families, and members of the health care team at ease

8.8 Recognize that ambiguity is part of clinical health care and respond by utilizing appropriate resources in dealing with uncertainty

9 FSU COM MISSION: Demonstrate responsiveness to community needs – especially elder, rural, minority and underserved populations

9.1 Describe the social determinants of health, and identify how they create opportunities for and barriers to
