Adding Videos to PowerPoint

Options:

- 1. Link out to online video
- 2. Embed video using embed code
 - a. Clip the Embedded video to show only a part of the YouTube Video
- 3. Capture video and insert it

1. Link out

- 1. Put a Hyperlink to the site like https://www.youtube.com/watch?v=9-kkzXTYoZs
- 2. When you click on the link in PowerPoint Slideshow, your default browser will open to the YouTube video

2. Embed video using embed code

PowerPoint (2013 or 2016) uses what are referred to as the "old embed codes" which YouTube no longer provides. They start with **<object...** The new codes start with **<iframe width...** and do not work. To generate the Old Embed Code, you can use the following web site:

http://www.gorissen.info/Pierre/files/YouTube_code.htm?YouTubeURL=http%3A//www.gorissen.info/Pierre/files/YouTube_code.htm

- 1. Copy the Youtube.com URL for the video you want and paste it into the above web site. Set the width in pixels that you want and click Generate! Copy the code generated.
- 2. In PowerPoint, go to the slide in which you want to insert the video
- 3. Click on the Insert tab and click Video > Online Video.
- 4. Under Embed Code, paste the code you copied from the Gorissen site.
- 5. Click the little arrow at the right of the embed code.
- 6. The video black box should appear. You can adjust the size.

a. Clip the video to only a small section of the YouTube video.

- 1. Watch the video and write down the start second and stop second you want the clips.
- 2. In the Embed code, at the end of the quotation sequence that contains the URL add the following: ;start=xx;end=xx" where xx is the # seconds into the video to start and end. Example code:

```
<object width="475" height="381"><param
value="http://www.youtube.com/v/watch?v=Uteelo8nQ
VA&showsearch=0&rel=0&fs=1&autoplay=0&amp;ap=%
2526fmt%3D18;start=5;end=90" name="movie"
/><param value="window" name="wmode" /><param
value="true" name="allowFullScreen" /><embed
width="475" height="381" wmode="window"
allowfullscreen="true" type="application/x-shockwave-
flash"
src="http://www.youtube.com/v/watch?v=Uteelo8nQVA
&showsearch=0&fs=1&rel=0&autoplay=0&amp;ap=%252
6fmt%3D18"></embed></object><br /><a
href="http://www.youtube.com/v/watch?v=Uteelo8nQVA
%showsearch=0&fs=1&rel=0&autoplay=0&amp;ap=%252
6fmt%3D18"></embed></object><br /><a
href="http://www.youtube.com/watch?v=Uteelo8nQVA
%showsearch=0&fs=1&rel=0&autoplay=0&amp;ap=%252
6fmt%3D18"></embed></object><br /><a
href="http://www.youtube.com/watch?v=Wteelo8nQVA
%showsearch=0&fs=1&rel=0&autoplay=0&amp;ap=%252
6fmt%3D18"></embed></object><br /><a
href="http://www.youtube.com/watch?v=Wteelo8nQVA"
href="http://www.youtube.com/watch?v=watch?v=Uteelo8nQVA"
href="http://www.youtube.com/watch?v=
```

3. Capture video and insert it

Firefox has an Add-on which will allow you to download any streaming video. It is called **Video DownloadHelper**. Go get it here <u>https://addons.mozilla.org/en-US/firefox/addon/video-downloadhelper/</u> and add to Firefox. When there is a video on any webpage that you want to capture, the little balloons will turn colors. Click them and pick the version you want to capture (MP4...) Save to a place on your hard drive. Now you can insert the file into PowerPoint, and it will save as a part of the file. Note: videos make PowerPoint files huge.

- 1. In PowerPoint, go to the slide in which you want to insert the video
- 2. Click on the **Insert** tab and click **Video** > Video on my PC.
- 3. Navigate to the video file, select it and click **Insert**.
