Funding Opportunities & Announcements

ALERTS

NIH Standard Due Dates

Cycle I began on January 25, 2018 and standard due dates for common mechanisms are as follows:

- R01 (new) February 5
- K Series (new) February 12
- R03, R21, R33, R34, R36 (new) February 16
- R15 (all) February 26
- R01 (renewals, resubmissions, revisions) March 5
- K Series (renewals, resubmissions, revisions) March 12
- R03, R21, R33, R34, R36 (renewals, resubmissions, revisions) March 16
- F Series (all) April 9

Cycle 2 will begin on May 25, 2018 and standard due dates for common mechanisms are as follows:

- R01 (new) June 5
- K Series (new) June 12
- R03, R21, R33, R34, R36 (new) June 16
- R15 (all) June 26
- R01 (renewals, resubmissions, revisions) July 5
- K Series (renewals, resubmissions, revisions) July 12
- R03, R21, R33, R34, R36 (renewals, resubmissions, revisions) July 17
- F Series (all) August 8

Help us help you! The sooner you let us know of your intent to submit a proposal for extramural funding (30 days is recommended), the sooner we can help you navigate the paths to a successful submission. All proposal elements are due to our office ten (10) business days in advance so we can secure all COM approvals and help you assemble the complete proposal by the University's three (3) business days deadline for institutional approval. <u>More Information</u>.

Delay Implementation of the Revised Federal Policy for the Protection of Human Subjects

On January 17, 2018, the U.S. Department of Health and Human Services and 15 other federal departments issued an interim final rule to delay the implementation of the revised <u>Federal Policy for the Protection of Human Subjects</u> ("Common Rule") for six months, until July 19, 2018 to provide regulated entities additional time to make the necessary preparations to implement the revised regulations. This date marks a delay for both the effective and general compliance date of the revised regulations, which were first issued in 1991 and revised on January 19, 2016. The interim final rule is scheduled for publication in the Federal Register on January 22, 2018 and can be accessed <u>here.</u>

NIH Single IRB (sIRB) Policy

FSU Sponsored Research has announced FSU's implementation of the <u>NIH Single IRB (sIRB) Policy</u>. Please see the <u>Office of</u> <u>Research Human Subjects News and Events page</u> for more details. As an important note, FSU Investigators preparing a proposal on a multi-site study should contact the FSU IRB to discuss the details of the award and whether FSU can act as the single IRB.

GRANTSMANSHIP

Substance Abuse and Mental Health Services Administration (SAMHSA) New Grant Application Manual

The Substance Abuse and Mental Health Services Administration (SAMHSA) has issued a new manual that is available for grant applicants, entitled "Developing a Competitive SAMHSA Grant Application". This manual will provide applicants with valuable information about how to prepare a strong grant application. There was a webinar hosted in February to review the information in the new manual. Playback is available here.

Avoid the Return: 10 Common Grant-Writing Mistakes

The Chronicle of Higher Education has posted an article identifying common mistakes made in grant writing. In their article, Jude P. Mikal and Gina Rumore explain how researchers can avoid these mistakes and write a better proposal. <u>Read</u> more.

FEATURED FUNDING OPPORTUNITIES

The Retirement Research Foundation Responsive Grants

The Retirement Research Foundation funds research projects that have a regional or national impact on older Americans. Of particular interest are projects that seek causes and solutions to significant problems facing older adults, ages 65 and older, through support of applied and policy research for which federal funding is not available. The required letter of intent is due **March 15, 2018**. <u>More information</u>.

The Association for Frontotemporal Degeneration (AFTD) 2018 Pilot Grant for Nonpharmacological Therapies and Tools for Frontotemporal Degeneration (FTD)

The association for Frontotemporal Degeneration (AFTD) Pilot Grants provide seed funding for innovative research proposals in the preliminary stages of development with the potential to address the challenges of living with frontotemporal degeneration (FTD). The FTD disorders include: behavioral variant FTD, primary progressive aphasia, progressive supranuclear palsy, corticobasal syndrome, and FTD-ALS/FTD-MND. In this new grant series we welcome evidence-based research proposals for the development of nonpharmacological therapies or tools that can positively impact the daily quality of life for FTD patients and families. Pilot grant-funded projects are intended to generate data that will support follow-on funding applications to the National Institutes of Health or other public or private agencies. This grand provides \$60,000 for one year. The application deadline is **March 19, 2018**. <u>More information</u>.

The Doctors Company Foundation Grant

The purpose of the Doctors Company Foundation is to support patient safety education for healthcare professionals in training and in practice, and patient safety research with clinically useful applications. In this context, patient safety is defined as a healthcare discipline that minimizes the incidence and impact of adverse events by redesigning systems and processes using human factors principles to reduce errors. The Foundation does not support clinical research projects primarily involving the provision of medical support services to patients. Construction projects and the purchase of equipment will not be funded. The application deadline is **March 22, 2018**. <u>More information</u>.

Craig H. Neilsen Foundation Psychosocial Research (PSR) Grants

The Craig H. Neilsen Foundation is offering two upcoming grant opportunities. Craig H. Neilsen Foundation's funding is dedicated to supporting both programs and scientific research to improve the quality of life for those affected by and living with spinal cord injury. If you are interested to submit a letter of intent for these grants, please notify <u>re-</u><u>search@med.fsu.edu</u>. An analyst will be assigned to assist you with proposalCENTRAL administrative requirements. The required letter of intent deadline for all opportunities listed below is **March 23, 2018.** <u>More information.</u>

• Spinal Cord Injury Research on the Translational Spectrum (SCIRTS)

FEATURED FUNDING OPPORTUNITIES (Cont.)

Primary Sclerosing Cholangitis (PSC) Partners Seeking A Cure Young Investigator Award

Primary Sclerosing Cholangitis (PSC) Partners Seeking a Cure is delighted to provide a Young Investigator Award to promising researchers who are at the early stages of their research career and are interested in clinical, translational or basic research on Primary Sclerosing Cholangitis. The Young Investigator Award is a research grant in the amount of \$80,000 (\$40,000 per year, paid over 2 years). The application deadline is **March 25, 2018.** <u>More information.</u>

Organization for Autism Research Applied Research Competition

The Organization for Autism Research funds studies that expand knowledge related to autism intervention and treatment, produce practical and clearly objective results, impact public policy, and provide outcomes that enhance quality of life for persons with autism and their families. The annual Applied Research Competition is the most competitive line of funding that the Organization for Autism Research offers. Researchers can apply for 1-2 year grants of up to \$30,000. Since 2002, the Organization for Autism Research has proudly contributed more than \$3.5 million in grants to support over 200 autism pilot studies. The required pre-proposal deadline is **March 26, 2018**. <u>More information</u>.

Davis Phinney Foundation for Parkinson's Research Grant

The Davis Phinney Foundation is committed to funding the most promising research aimed at therapeutics and lifestyle choices that promote living well with Parkinson's disease today and every day. The Foundation tends to fund smaller, innovative studies designed to demonstrate proof of concept, paving the way for larger studies or clinical trials. Research Funding Program investments tend to fall into two areas: 1) Research- and science-based *programs* that can have an immediate impact in the lives of people with Parkinson's today; and 2) *Research* that explores a range of factors that affect quality of life. The Davis Phinney Foundation will commit up to \$200,000 in 2018-2019 to be used for research and/or program costs. The Funding Priority identified by the Foundation for the 2018 funding cycle is broadly the topic of exercise related to living well with Parkinson's. The required letter of intent is due **March 26, 2018**. <u>More information</u>.

B*CURED 2018 Brain Research Investigator Grant

B*CURED's primary goal is to fund innovative brain cancer research to end brain cancer. This award is presented annually by B*CURED to a clinical doctor or research scientist whose primary focus is brain cancer research. Clinical projects are encouraged, as well as translational projects with significant clinical promise. *The research project must be directly related to the field of brain cancer*. Projects for adult and pediatric brain cancer research will be considered. The award will be for \$50,000 and will be given in two installments. The application deadline is **April 1, 2018**. <u>More information</u>.

American Cancer Society Projects in Palliative Care of Cancer Patients and Their Families

In an effort to support clinician investigators conducting patient-oriented research in palliative care, the American Cancer Society, in parallel with the National Palliative Care Research Center (NPCRC), is soliciting applications for pilot/ exploratory research grants in palliative care of cancer patients and their families. This RFA is limited to applications that focus on palliative care research projects for seriously ill cancer patients and their families in three specific areas: 1. Exploring the relationship of pain and other distressing symptoms on quality and quantity of life, independence, function, and disability and developing interventions directed at their treatment in patients with advanced and chronic illnesses; 2. Studying methods of improving communication between adults living with serious illness, their families and their health care providers; 3. Evaluating models and systems of care for patients living with advanced illness and their families. The application deadline is **April 2, 2018.** More information.

Autism Science Foundation Research Accelerator Grant

The Autism Science Foundation invites applications for its Research Accelerator Grants. These grants are designed to expand the scope, speed the progress, or increase the efficiency, and improve final product dissemination of active autism research grants. Grants of up to \$5,000 are available to enhance, expand, and enrich grants currently funded by other sources (including ASF). Staff salary may be covered by this award. All projects must have prior IRB approval. The application deadline is **April 3, 2018**. <u>More information</u>.

FEATURED FUNDING OPPORTUNITIES (Cont.)

Medical Marijuana Research and Education (MMRE): Research and Education Projects

The State of Florida's Medical Marijuana Research and Education (MMRE) Program invites investigators from across the state to apply for funding for research and education projects. Proposals must meet one of the following two objectives: 1. Identify and prioritize the research eligible to be conducted through the Coalition to develop a comprehensive evidence base on the short- and long-term health effects of marijuana for medical use, addressing the key gaps in the evidence base. 2. Build infrastructure to increase knowledge and understanding of current evidence on the short- and long-term health care professionals, policy makers, growers, marijuana dispensaries/pharms, public, patients and caretakers. The proposed projects are expected to ultimately result in additional grant applications to other sponsors or lead to clinical research studies. The application deadline is **April 12, 2018**. <u>More information</u>.

Chan Zuckerberg Initiative (CZI) Grant Programs

The Chan Zuckerberg Initiative (CZI) invites applications to join the CZI Neurodegeneration Challenge Network, an interdisciplinary collaborative initiative to increase understanding of the fundamental biology of neurodegenerative disorders. The CZI Neurodegeneration Challenge Network has three goals: (1) to make fundamental advances toward understanding neurodegeneration; (2) to bring new ideas and talent to the field of neurodegeneration; and (3) to encourage a new type of interdisciplinary collaborative research involving scientists, clinicians and engineers. Applications are being accepted for two funding mechanisms; deadlines are listed below. <u>More information</u>.

- CZI Collaborative Science Awards Letter of Intent due April 3, 2018
- CZI Ben Barres Early Career Acceleration Awards Application due April 17, 2018

Whitehall Foundation Research Grants

The Whitehall Foundation, through its program of grants and grants-in-aid, assists scholarly research in the life sciences. Research grants are available to established scientists of all ages working at accredited institutions in the United States. Applications will be judged on the scientific merit and the innovative aspects of the proposal as well as on the competence of the applicant. Research grants of up to three years will be provided. A renewal grant with a maximum of two years is possible, but it will be awarded on a competitive basis. Research grants will not be awarded to investigators who have already received, or expect to receive, substantial support from other sources, even if it is for an unrelated purpose. Research grants normally range from \$30,000 to \$75,000 per year. The required letter of intent deadline is **April 15, 2018.** <u>More information.</u>

American Diabetes Association Core Program

The American Diabetes Association's Core Research Program funds research with novel and innovative hypotheses in any area relevant to the etiology of diabetes and its complications that hold significant promise for advancing the prevention, cure, or treatment of diabetes. Basic, clinical, translational, and epidemiological or health services research approaches are encouraged. The application deadline for all opportunities listed below is **April 16, 2018**. <u>More information</u>.

- Innovative Basic Science (IBS)
- Innovative Clinical or Translational Science (ICTS)

Cystic Fibrosis Foundation Research Grants

The Cystic Fibrosis Foundation offers competitive awards and grants to members of the research and medical community who help advance cystic fibrosis research and care. Research grants are intended to support basic science research. Studies may be carried out at the subcellular, cellular, animal, or patient levels. To be considered, proposals must be hypothesis-driven and provide sufficient preliminary data to justify Cystic Fibrosis Foundation support. Support is available for \$100,000 per year (plus 8 percent for indirect costs) for up to two years, at which time a grant may be competitively renewed for additional funding. The application deadline is **April 19, 2018.** <u>More information.</u>

Elsa U. Pardee Foundation Cancer Research Grants

The Elsa U. Pardee Foundation funds research to investigators in United States non-profit institutions proposing research directed toward identifying new treatments or cures for cancer. The Foundation particularly encourages grant applications for a one year period which will allow establishment of capabilities of new cancer researchers, or new cancer approaches by established cancer researchers. *[continued on page 5]*

Med-RA

FEATURED FUNDING OPPORTUNITIES (Cont.)

It is anticipated that this early stage funding by the Foundation may lead to subsequent and expanded support using government agency funding. Project relevance to cancer detection, treatment, or cure should be clearly identified. The application deadline is **April 30, 2018.** <u>More Information.</u>

W. M. Keck Foundation Research Program

The W. M. Keck Research Program seeks to benefit humanity by supporting projects in two specific areas: 1) medical research and 2) science and engineering, that are distinctive and novel in their approach, question the prevailing paradigm, or have the potential to break open new territory in their field. Past grants have been awarded to support pioneering biological and physical science research and engineering, including the development of promising new technologies, instrumentation or methodologies. The application deadline is **May 1, 2018**. <u>More information</u>.

William T. Grant Foundation Research Grants

The William T. Grant Foundation Research Grants program supports high-quality field-initiated studies that are relevant to policies and practices that affect the lives of young people ages 5 to 25 in the United States. Proposed research must address questions that align with one of the Foundation's two focus areas: 1) Reducing Inequality, 2) Improving the Use of Research Evidence. Research proposals are evaluated on the basis of their fit with a given focus area; the strength and feasibility of their designs, methods, and analyses; and their potential to inform change and contribute to bodies of knowledge that can improve the lives of young people. The application deadline is **May 2, 2018.** <u>More information</u>.

Florida Medical Malpractice Joint Underwriting Association's Alvin E. Smith Safety of Health Care Services Grant Program

The Florida Medical Malpractice Joint Underwriting Association is seeking applications for their grant program. The ultimate goal of this grant program is to improve the safety of health care services for all Floridians. The purpose of this RFA is to support projects that are intended to (1) identify, develop, test, and implement safe practice initiatives in inpatient and/or outpatient settings; and (2) share the findings and lessons learned including the challenges and barriers to developing and implementing these interventions through validated tools, products, and/or health care safety toolkits. The interventions and any resulting implementation toolkits shall be made publicly available so that they may be adapted and/or adopted by other health care organizations. Please note that this is a limited submission opportunity; if you are interested in applying, please notify <u>research@med.fsu.edu</u> as soon as possible. The application deadline is **May 21, 2018**. <u>More information</u>.

Russell Sage Foundation Grants

The Russell Sage Foundation (RSF) invites letters of intent for several opportunities. RSF has long had the mission to improve social and living conditions in the United States. It pursues this goal by supporting outstanding research in the social sciences that explores how social, economic, and political factors affect the lives of Americans and their children. RSF also has a long history of encouraging new scientific advances to strengthen the methods, data, and theoretical core of the social sciences. The required letter of intent deadline for all opportunities listed below is **May 24, 2018.** More information.

- Race, Ethnicity & Immigration
- Behavioral Economics
- Integrating Biology and Social Science Knowledge (BioSS)
- Computational Social Science

The Little Giraffe Foundation Neonatal Research Initiative

The Little Giraffe Foundation invites applications for research grants directed at addressing both the long term and immediate health needs caused by premature birth. Research subjects appropriate for support by the Little Giraffe Foundation include basic biological processes governing development, genetics, clinical studies, studies of reproductive health, environmental toxicology, and social and behavioral studies. Please note that studies related to development of educational interventions or to address quality improvement initiatives will not be considered for funding. The required letter of intent is due July 20, 2018. <u>More information</u>.

OTHER FUNDING RESOURCES

Pivot

From any on-campus computer, go to <u>http://pivot.cos.com</u>. FSU's IP addresses will be recognized by Pivot, so you can start searching for funding opportunities right away. Creating a Pivot account is easy—at the website, click "Sign up" in the upper right corner. Once registered, you can log in with a Pivot username and password anytime, anywhere. Log-ging in allows you to manage active or tracked funding opportunities, save searches, share opportunities, and search for potential collaborators. Username and password access is necessary when you are off-campus or when you want to save a funding record or funding search.

FSU Foundation Search Tool and Corporate Development Assistance

For grant funding assistance related to your programmatic research and academic initiatives, the Office of Corporate & Foundation Development is happy to provide institution-wide access to the Foundation Center Online database accessible through FSU IP. <u>Click here</u> to begin your search of over 100,000 private foundations and charities.

The FSU Foundation can also assist researchers by establishing relationships with corporations and private foundations. Corporate Development staff members will work with you on proposal and concept development, private foundation or corporation research, and the submission process of grant proposals. <u>More Information</u>.

Postdoc and Student Resources

UCLA Graduate & Postdoctoral Extramural Support (GRAPES) Database

This database catalogs extramural funding opportunities of interest to students and postdoctoral scholars. It contains information on over 500 private and publicly funded awards, fellowships, and internships. Access the database through the **<u>GRAPES Search Form</u>**.

FSU Office of Postdoctoral Affairs

Part of The Florida State University's Graduate School, the Office of Postdoctoral Affairs (OPA) serves as a central resource and information conduit for all postdoctoral researchers as well as faculty and staff who work with postdoctoral researchers at FSU. The OPA publishes a weekly digest. Additionally, FSU is a sustaining member of the National Postdoctoral Association, giving all postdocs at FSU Affiliate Membership in the NPA. <u>More Information</u>.

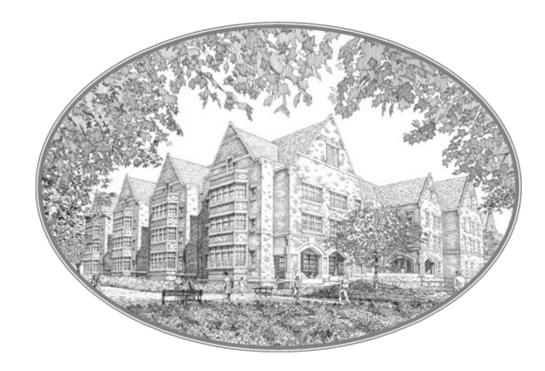

Research Fellowships for Medical Students

Many medical schools and institutions offer programs for medical students who are interested in exploring research as part of their career. Fellowships and scholarly programs are offered in summers or as year-long programs. Fourth and fifth year medical students can also participate in research electives. <u>More Information</u>.

SUBMITTING PROPOSALS FOR GRANTS AND CONTRACTS

College of Medicine, Office of Research Administration (Med-RA)

Help us help you! The sooner you let us know of your intent to submit a proposal for extramural funding, the **sooner we can help you navigate** the paths to a successful submission. Our goals are to assist you with the CoM requirements and those of FSU Sponsored Research Administration (SRA), or in the case of private funding, the FSU Research Foundation (FSURF); minimize the administrative burden; and meet sponsor guidelines in a seamless, integrated fashion.

SRA/FSURF requires "complete" proposals three (3) business days in advance of the sponsor's deadline. *Please note that generally our office works on a first in, first out basis.* If you contact us at least 30 days in advance, together we can identify, gather, or create the elements/components, then assemble the application by the SRA/FSURF deadline for institutional approval. The goal is to have all the elements needed to assemble a complete proposal for SRA/FSURF no later than 10 business days before the sponsor's deadline.

10-Day Advance Proposal Preparation Guidelines

Contact Med-RA at research@med.fsu.edu for proposal preparation assistance.

Med-RA Staff:

Jason Gibson, Analyst Jessie Gray, Analyst Ellen Potts, Assistant Director Emily Keeney, Research Office Administrator

If you have any questions, call (850)645-9184 or visit us in MSR Suite 1309. For further information visit the

Med-RA Website.
