WHAT IS A PASSWORD MANAGER?

A password manager is a service that remembers your passwords, so you don’t have to.

In addition to helping you organize and manage your logins, it makes it easy for you to follow best password practices.
WHY EMPLOYERS CHOOSE LASTPASS

Over 17,000 organizations trust LastPass to strengthen company password practices, protect against data breaches, and achieve regulatory compliance.
GETTING STARTED: ACCEPTING THE INVITE

LastPass Account Created

Hi, your employer has created a LastPass Enterprise account for you. LastPass is a password management tool that allows you to safely store your everyday passwords behind a single Master Password. LastPass will then automatically log you in to your sites and applications, keeping your data secure while helping you be more productive.

Your username is fan@lastpass.com
Your temporary password is abc123

To get started, click here to reset your password.

Click here for a 5-minute introductory tutorial. Other helpful screencasts can be found at https://lastpass.com/support_screencasts.php.

Thanks,
The LastPass Team

Your security is our priority.
Never share your Master Password with anyone, including us!
A strong master password is key for your security.

Your password should include at least 15 characters combining numbers, symbols, and letters, without using dictionary-based words.

Complete this form to reset your LastPass master password

- **Email**: cidferrara+emailest1@gmail.com
- **Old Password**: ********

LASTPASS SAVES AND FILLS LOGINS FOR YOU

Use the LastPass in-field icon to save a new login or to select from the accounts you’ve already stored.
Create secure, unique passwords when registering for a new account or updating the password for an old login.

Use the in-field icon to open the generator and save the new password to your vault.

Use the in-field icon to open the generator and save the new password to your vault.
FILL IN ONLINE FORMS FASTER

Save time and create a secure form fill profile for simplified checkout and registration.

From the LastPass extension, open Form Fills to add or edit profiles. Click the in-field icon to select a profile and instantly fill a form.
STORE ANYTHING IN SECURE NOTES

Use Secure Notes to securely save things like WiFi logins, membership cards, and PIN codes.

From the LastPass browser extension, click the Secure Notes menu to add notes or edit.
LASTPASS ON THE GO

Download the LastPass mobile apps for Android, iOS, and other smartphones to access your vault and login to sites. View, edit, add, and fill passwords with the mobile app.

Fill app logins and Chrome web logins.

Fill web logins in Safari.
SHARED LOGINS & FOLDERS

Conveniently share access to logins across functional teams with Shared Folders.

A Shared Folder will appear in the vault as Shared-‘Folder Name’.

In the vault, drag-and-drop Sites or Secure Notes to add them to the folder, or drag them to convert an existing folder to a Shared Folder at any time, or edit the permissions of the folder.

Folder Name:

Select “Manage Shared Folders” in the vault to create, assign, and customize permissions to folders.
TAKE THE LASTPASS SECURITY CHALLENGE

The Security Challenge identifies weak, duplicate, and potentially breached passwords.

From the LastPass browser extension, select Tools and run the Security Check.
