ALERTS

NIH Standard Due Dates

Cycle I will begin on January 25, 2016 and standard due dates for common mechanisms are as follows:

- R01 (new) - February 5
- K Series (new) - February 12
- R03, R21, R33, R34, R36 (new) - February 16
- R15 (all) - February 25
- R01 (renewals, resubmissions, revisions) - March 7
- K Series (renewals, resubmissions, revisions) - March 14
- R03, R21, R33, R34, R36 (renewals, resubmissions, revisions) - March 16
- F Series (all) - April 8

Help us help you! The sooner you let us know of your intent to submit a proposal for extramural funding (30 days is recommended), the sooner we can help you navigate the paths to a successful submission. All proposal elements are due to our office ten (10) business days in advance so we can secure all COM approvals and help you assemble the complete proposal by the University’s three (3) business days deadline for institutional approval. More Information.

2016 College of Medicine Research Fair and Summer Research Fellowship Proposals

The Twelfth Annual Research Fair, sponsored by the Division of Research, Graduate and Undergraduate Programs, will be held on Monday February 8th, 2016 in the College of Medicine Atrium from Noon to 1:30pm. We invite ALL researchers to register and present their work so that we can learn about the exciting research being done at the College of Medicine! Medical student researchers, graduate students, postdocs, residents, staff and faculty are invited to present posters. This event also serves as an opportunity for first year medical students to identify research projects of interest and apply for the 2016 Summer Research Fellowships.

The Summer Research Fellowship program allows for medical students to participate in research with the assistance of a faculty mentor. Medical students wishing to participate in the Summer Research Fellowship program are required to submit a research proposal in order to be considered for a $2,500 award. Research proposals are due by 5:00 p.m. on Friday, March 25, 2016. You may email your proposal to research@med.fsu.edu. Detailed guidelines for submissions are available at the Medical Student Research Opportunities web site. Questions can be directed to Sara Shaw at sara.shaw@med.fsu.edu or 645-7341.

3rd Annual Florida Health Equity Research Institute (HERI) Summit and Scholar Program Awards

The HERI Research Core is proud to announce the Florida HERI Research Leadership Scholar Program Award. This award will: (1) Support a minimum of 20 research scholars to attend the HERI Summit in February; and (2) Provide successful scholars with grant writing and career mentorship over a one-year period. This application is open to all underrepresented minority investigators and post-doctoral scholars. The deadline to apply for the Research Leadership Scholar Award is January 8, 2016. The summit is scheduled for February 5-6, 2016 in Tampa. More Information.

NSF 2016 Application Changes
Small but not insignificant changes are in effect after January 22:
- You are required to complete the new single copy document for “Collaborators and Other Affiliations” upon submission.
- While filling in the Biographical Sketches or Current and Pending Support sections, you will need to upload a separate file for each senior personnel.
- It is no longer allowable for current and pending support for all senior personnel to be grouped together in a single PDF upload.
- When suggesting reviewers, email addresses will be required.
- System upgrades now restrict submissions 5:00 PM local time, no exceptions.

More information.

Spring 2016 NIH Regional Seminar in Baltimore
If you are new to the NIH grants process, then you will not want to miss attending this event. The NIH Regional Seminar offers participants an unparalleled opportunity to gain a better perspective of NIH policies and programs, network with their peers, and gather helpful NIH contacts. The goal is for participants to return to their offices and/or labs with this new understanding, as well as a wealth of resources tools to assist them in obtaining and managing NIH awards. The spring seminar will be held in Baltimore, Maryland, May 11-13, 2016. More Information.

GRANTSMAKSHIP

Tantalizing Resources Available Through the Office of Proposal Development:
- “Grants are won on page one. This is where you set the stage for the all subsequent narrative text. This is where you win over reviewers to your great idea.” Research Development and Grant Writing News, volume 6, issue 3. More information.
- “Success in proposal writing is all about answering questions—questions posed in the funding solicitation, during the review process, and questions posed by team members during the planning and writing of the research project narrative.” Research Development and Grant Writing News, volume 6, issue 3. More information.
- “Looking for the fast path to grant rejection? We provide a list here of proven techniques.” More information.

FEATURED FUNDING OPPORTUNITIES

Internal Competition for Microgrants
The FSU College of Medicine, as part of the OneFlorida Clinical Research Consortium partnership with the University of Florida, is pleased to announce the creation of the Research Microgrant Program and immediate call for proposal applications. Applications for the first round of funding should be submitted as soon as possible and will be evaluated beginning January 15, 2016. Up to six competitive awards of up to $12,000 each will be made available on a rolling basis. The awards are intended to support research by FSU COM faculty members aimed specifically at collecting preliminary data involving the FSU COM Clinical Research Network for a research project that will generate future extramural grant applications. More information.

GLMA, Lesbian Health Fund
The Lesbian Health Fund (LHF), a program of GLMA: Health Professionals Advancing LGBT Equality, was established in 1992 to define, study, and educate lesbians and their health care providers about lesbian health issues. Research areas include: Understanding social, family, and interpersonal influences as sources of stress or support; eliminating inequalities in health care, including barriers to care, and improving quality of care and utilization rates; development and testing of interventions to address mental and physical health needs of lesbians and other SMW, including but not limited to depression, identity related issues, eating disorders, substance abuse, obesity, cancer risks, cardiovascular disease and sexually transmitted infections; sexual and reproductive health, including family & parenting issues. The application deadline is February 1, 2016. More Information.
FEATURED FUNDING OPPORTUNITIES (Cont.)

FSU Council on Research and Creativity, Spring 2016 Grant Cycle - Updated
Full-time faculty are eligible for these programs except where noted. Visiting professors will be considered eligible providing the sole reason for their “visiting” status is that they are awaiting permanent US residency. The Council on Research and Creativity (CRC) has a new on-line submission portal, and new policies and procedures for grants. The process is now entirely electronic, but Med-RA review is still required. An information guide is now available at the Med-RA website. It is also recommended that you visit the CRC website for more information.

- Developing Scholar Award (DSA): Deadline is January 22, 2016
- Distinguished Research Professor Award (DRP): Deadline is February 12, 2016
- Distinguished University Scholar (DUS): Deadline is February 22, 2016
- Planning Grant (PG): Spring deadline is March 2, 2016
- Small Grant Program (SPG): Spring deadline is March 16, 2016
- Equipment and Infrastructure Enhancement Grant (EIEG): Spring deadline is March 24, 2016

The Retirement Research Foundation, Responsive Grants
The Retirement Research Foundation is one of the first private foundations in the nation devoted exclusively to aging and retirement issues. RRF’s Responsive Grants program supports projects in the following four major areas: Advocacy, direct service, professional education and training, and research. The goals of these respective areas focus on seeking causes and solutions to significant problems for older adults, increase the competency of professionals and paraprofessionals who serve older adults, improve availability and quality of community-based and residential long-term services and supports, and achieve enduring social change around issues that affect older Americans. The application deadline is February 1, 2016. More Information.

NIH R01 Holders: Additional Funding Available to Study Mobile/Wireless Health Tools
This announcement invites revision applications from investigators and institutions/organizations with active NIH-supported research project awards to support an expansion of the scope of approved and funded projects to incorporate recent advances in mobile/wireless tools to validate these tools for measurement and intervention delivery. Revision applications for projects that do not currently employ mobile/wireless tools are welcome provided that the applicant team has the requisite scientific and technical expertise to employ and validate these tools. By supporting revisions to existing R01 projects, this FOA encourages the rapid validation of mobile/wireless tools for health measurement and intervention delivery. The focus of this FOA is on recently developed mobile/wireless health tools including sensor technologies and smartphone applications. The application deadline is February 5, 2016. More Information.

NIH, Applying Metabolomics to Drive Biomarker Discovery in Symptom Science (R01)
The purpose of this funding opportunity announcement is to encourage applications on biomarker discovery that utilize metabolomics approaches to advance the understanding, assessment and management of symptoms. The application deadline is February 5, 2016. More Information.

JDRF, Biomarkers of Progression in the At-Risk Setting for Type 1 Diabetes
JDRF and Janssen’s Disease Interception Accelerator are soliciting applications to discover and develop candidate biomarkers of progression in the at-risk setting for type 1 diabetes (T1D). Validated biomarkers that detect risk, stage the disease, and predict its rate of progression in the at-risk setting for T1D are required to provide a framework for clinical trial design, benefit/risk decisions around interventions, and ultimately for the practice of predictive medicine to prevent symptomatic T1D. These biomarkers may include markers of beta cell stress, dysfunction, and damage, functional beta cell mass, autoimmune/inflammatory biomarkers, and/or biomarkers of impaired glucose and metabolic control. Applications are sought from investigators with access to existing samples and/or patient cohorts of at-risk subjects to develop improved prognostic risk scores of progression and/or to develop new or improved screening assays. The translational potential of the investigations should be highlighted and thus, only research plans involving human samples will be considered. The application deadline is February 5, 2016. More Information.
FEATURED FUNDING OPPORTUNITIES (Cont.)

Pfizer, Narrowing the Time Gap between Onset of Symptoms and Treatment for Rheumatoid Arthritis
It Pfizer’s intent to support projects that focus on closing the gap in time between the onset of symptoms indicating RA and initiation of appropriate DMARD therapy. Measures of success should include time to treatment as a metric. The use of disease activity measures as an outcome measure is encouraged. Projects that employ well considered, systems-based changes likely to result in patient outcomes improvement will be given priority during review. The ability of a project to be replicated at other institutions will be a key consideration when reviewing projects. Projects that can be disseminated and impact a wide range of demographic groups will be a priority. The letter of intent deadline is February 11, 2016. More Information.

Environmental Protection Agency, Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement Including Public Health
The Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program provides funding for eligible applicants for projects which demonstrate the use of the Environmental Justice Collaborative Problem Solving Model. The purpose of the EJCPS program is to support community-based organizations to collaborate and partner with other stakeholders (e.g., industry, government, academia, etc.) as they develop and implement solutions that address environment and/or public health issue(s) at the local level. Organizations are encouraged to have a connection between the proposed project activities and applicable neighborhood, local, city, or regional land use planning efforts. The application deadline is February 12, 2016. More Information.

NIH, Applying Metabolomics to Drive Biomarker Discovery in Symptom Science (R21)
The purpose of this funding opportunity announcement is to encourage applications on biomarker discovery that utilize metabolomics approaches to advance the understanding, assessment and management of symptoms. The application deadline is February 16, 2016. More Information.

Glenn/AFAR Postdoctoral Fellowship Program for Translational Research on Aging
The program was developed to address the current concerns about an adequate funding base for postdoctoral fellows (MD, MD/PhD and PhD) who specifically direct their research towards translational findings and who will demonstrate how their research will have direct benefits to human aging. Postdoctoral fellows at all levels of training are eligible. Up to ten one-year fellowships will be awarded. The award levels range from $49,000 to $60,000, based on years of relevant experience. The letter of intent deadline is March 3, 2016. More Information.

AHRQ, Increasing Access to Medication-Assisted Treatment (MAT) in Rural Primary Care Practices (R18)
This initiative will fund demonstration research projects that implement Medication-Assisted Treatment (MAT) for opioid use disorder in primary care practices in rural areas of the United States. In addition to expanding access to this evidence-based therapy in underserved communities, this initiative will discover and test solutions to overcoming known barriers to implementation of MAT in primary care and create training and implementation resources to support future efforts to expand access to MAT. The application deadline is March 4, 2016. More Information.

Association of American Medical Colleges, Abraham Flexner Award for Distinguished Service to Medical Education
The Abraham Flexner Award for Distinguished Service to Medical Education is awarded annually to an individual for extraordinary contributions to the medical education community. Nominations may be made by any faculty or staff member of a medical school or teaching hospital or by any member of an academic society. The submission deadline is May 6, 2016. More Information.
FEATURED FUNDING OPPORTUNITIES (Cont.)

The Hazel K. Goddess Fund for Stroke Research in Women, 2016 Scholars Program

The Goddess Fund's research strategy is to develop young investigators who will dedicate their careers to finding the answers. These promising scientists will become tomorrow's research leaders in the fight to "strike back against stroke" in women. The intent is to fund research programs that have great potential to change the medical care of women at risk for or suffering stroke. The research may be basic or clinical, focused on such areas as mechanisms of ischemic brain injury, neuroprotective treatments, primary or secondary stroke prevention, epidemiological studies, educational programs for patients or healthcare providers, rehabilitation and outcomes research. Submissions are currently open with deadlines to be announced in early 2016. More Information.

Hearst Foundations, Health Focused Grants

The Hearst Foundations support well-established nonprofit organizations that address significant issues within their major areas of interests – culture, education, health and social service – and that primarily serve large demographic and/or geographic constituencies. In each area of funding, the Foundations seek to identify those organizations achieving truly differentiated results relative to other organizations making similar efforts for similar populations. The Hearst Foundations assist leading regional hospitals, medical centers and specialized medical institutions providing access to high-quality healthcare for low-income populations. In response to the shortage of healthcare professionals necessary to meet the country’s evolving healthcare needs, the Foundations also fund programs designed to enhance skills and increase the number of practitioners and educators across roles in healthcare. The Foundations also support medical research and the development of young investigators to help create a broad and enduring impact on the nation’s health. Applications are accepted on a rolling basis. More Information.

NIH, Development of New Technologies and Bioengineering Solutions for the Advancement of Cell Replacement Therapies for Type 1 Diabetes (R43/R44)

This Funding Opportunity Announcement (FOA) invites Small Business Innovation Research (SBIR) grant applications for funding to perform research leading to the development of innovative technologies that may advance progress toward more effective cell replacement therapies for type 1 diabetes (T1D). The application opens for submission May 28, 2016 and closes June 28, 2016. More Information.

OTHER FUNDING RESOURCES

Pivot
From any on-campus computer, go to http://pivot.cos.com. FSU’s IP addresses will be recognized by Pivot, so you can start searching for funding opportunities right away. Creating a Pivot account is easy, at the website click “Sign up” in the upper right corner. Once registered, you can log in with a Pivot username and password anytime, anywhere. Logging in allows you to manage active or tracked funding opportunities, save searches, share opportunities, and search for potential collaborators. Username and password access is necessary when a) you are off-campus, or b) when you want to save a funding record or funding search.

FSU Foundation Search Tool and Corporate Development Assistance
For grant funding assistance related to your programmatic research and academic initiatives, the Office of Corporate & Foundation Development is happy to provide institution-wide access to the Foundation Center Online database accessible through FSU IP. Click here to begin your search of over 100,000 private foundations and charities.

The FSU Foundation can also assist researchers by establishing relationships with corporations and private foundations. Corporate Development staff members will work with you on proposal and concept development, private foundation or corporation research, and the submission process of grant proposals. More Information.

NIH Standard Due Dates for Competing Applications
All About Grants Podcasts - Conversations with NIH staff members providing inside information for successful grantsmanship.

NIH Extramural Nexus & Rock Talk Blog - News, updates and blog posts on extramural grant policies, processes, events and resources.

FSU Office of Research
Office of Proposal Development - The office provides a variety of services including proposal development assistance, faculty partnership identification, as well as training opportunities for faculty who are new to grant seeking and grant writing. Additionally, they offer copyediting services for researchers who speak English as a second language. More Information.

SRA Listserv Administration - Subscribe to keep up with notices of important news and events related to contracts and grants including limited submission opportunities. More Information.

Office of Research Newsletter - Online access to Sponsored Research’s monthly newsletter pertaining to research activities and important announcements. More Information.

Research Development and Grant Writing News - FSU has a subscription to this newsletter containing both articles and links to funding news. All FSU faculty, staff and students have access to current and back issues. To be added to the monthly distribution list, email bhodges@fsu.edu and you will also be provided with a username and password for the archives found at Research Development and Grant Writing News.

Limited Submission Opportunities - Funding Opportunities requiring an internal competition before submission to an external sponsor. More Information.

Internal Competitions - Funding Opportunities available only to FSU faculty. More Information.
OTHER FUNDING RESOURCES (Cont.)

Postdoc and Student Resources

UCLA Graduate & Postdoctoral Extramural Support (GRAPES) Database
This database catalogs extramural funding opportunities of interest to students and postdoctoral scholars. It contains information on over 500 private and publicly funded awards, fellowships, and internships. Access the database through the GRAPES Search Form.

FSU Office of Postdoctoral Affairs
Part of The Florida State University’s Graduate School, the Office of Postdoctoral Affairs (OPA) serves as a central resource and information conduit for all postdoctoral researchers as well as faculty and staff who work with postdoctoral researchers at FSU. The OPA publishes a weekly digest. Additionally, FSU is a sustaining member of the National Postdoctoral Association, giving all postdocs at FSU Affiliate Membership in the NPA. More Information.

Research Fellowships for Medical Students
Many medical schools and institutions offer programs for medical students who are interested in exploring research as part of their career. Fellowships and scholarly programs are offered in summers or year-long programs. Fourth and fifth year medical students can also participate in research electives. More Information.

SUBMITTING PROPOSALS FOR GRANTS AND CONTRACTS

College of Medicine, Office of Research Administration (Med-RA)

Help us help you! The sooner you let us know of your intent to submit a proposal for extramural funding, the sooner we can help you navigate the paths to a successful submission. Our goals are to assist you with the CoM requirements and those of FSU Sponsored Research Administration (SRA), or in the case of private funding, the FSU Research Foundation (FSURF), minimize the administrative burden, and meet sponsor guidelines in a seamless, integrated fashion.

SRA/FSURF requires "complete" proposals three business days in advance of the sponsor’s deadline. If you contact us at least 30 days in advance, together we can identify, gather, or create the elements/components, then assemble the application by the SRA/FSURF deadline for institutional approval. The goal is to have, in hand, no later than 10 business days before the sponsor’s deadline, all the elements needed to assemble the components for a complete proposal for SRA/FSURF. Piecemeal in advance of this goal is appropriate and encouraged.

Please note that generally our office works on a first in, first out basis, so let’s minimize "PTSD" (Proposal Tragedies, Shock and Dysfunction), while meeting the FSU three-day institutional approval deadline for a “complete” proposal!

10-Day Advance Proposal Preparation Guidelines

Contact Med-RA at research@fsu.edu for proposal preparation assistance.

Med-RA Staff:
Samantha Chahin, Office Assistant
Jason Gibson, Analyst
Jessie Gray, Analyst
Ellen Potts, Analyst
Sara Shaw, Research Administration Coordinator
Chuck Wells, Director

If you have any questions, call 645-7341 or visit us in MSB Suite G117 (lower level). For further information visit the Med-RA Website.
