

Funding Opportunities & Announcements

ALERTS

NIH Standard Due Dates

Cycle III began on **September 26, 2016** and standard due dates for common mechanisms are as follows:

- R01 (renewals, resubmissions, revisions) - November 7
- K Series (renewals, resubmissions, revisions) - November 14
- R03, R21, R33, R34, R36 (renewals, resubmissions, revisions) - November 16
- F Series (all) - December 8
- F31 (Diversity) - December 13

Cycle I will begin on **January 25, 2017** and standard due dates for common mechanisms are as follows:

- R01 (new) - February 6
- K Series (new) - February 13
- R03, R21, R33, R34, R36 (new) - February 16
- R01 (renewals, resubmissions, revisions) - March 6
- K Series (renewals, resubmissions, revisions) - March 13
- R03, R21, R33, R34, R36 (renewals, resubmissions, revisions) - March 16
- F Series (all) - April 10
- F31 (Diversity) - April 13

Help us help you! The sooner you let us know of your intent to submit a proposal for extramural funding (30 days is recommended), the sooner we can help you navigate the paths to a successful submission. All proposal elements are due to our office ten (10) business days in advance so we can secure all COM approvals and help you assemble the complete proposal by the University's three (3) business days deadline for institutional approval. [More Information.](#)

College of Medicine Human Subjects Research Review Process

All College of Medicine faculty, staff, residents, fellows and students conducting human subjects research must participate in an internal faculty-based review process through the College's Research Advisory Committee (RAC). Submissions for RAC review are online through the CoM SharePoint Intranet and should occur approximately three (3) weeks prior to the FSU IRB [submission deadline](#). Questions may be directed to RAC@med.fsu.edu. [More information.](#)

AHRQ Policy Guidance Regarding Inflationary Increases Beginning in Fiscal Year 2017

The Agency for Healthcare Research and Quality (AHRQ) has issued a notice regarding inflationary increases (aka, cost-of-living adjustments, or COLAs). Effective **Oct 1, 2016**, inflationary increases, or COLAs, for future year commitments will now be discontinued for all competing research grant awards issued in FY 2017 and beyond. Any funds budgeted/requested for COLAs or for anticipatory or contingent personnel costs in future years will be removed from the budget and these funds may not be rebudgeted for other purposes. [NOT-HS-17-001](#).

GRANTSMANSHIP

NIH Center for Scientific Review Hosts Webinars on Peer Review

The NIH Center for Scientific Review (CSR) is the portal for receipt and referral of NIH grant applications, and, for the majority of those applications, carries out the peer review process for assessing scientific and technical merit. In **November** and **December**, CSR will host three different "online briefings" on peer review for: fellowship grant applicants; R01 applicants; and researchers who are proposing and/or reviewing basic science applications. All of the briefings will be approximately one hour long, including a 30 minute question and answer period. For more information and to register for each webinar, [visit the CSR event website](#).

New Faculty Guide to Competing for Research Funding

The FSU Office of Proposal Development has subscribed to an excellent and robust resource, the New Faculty Guide to Competing for Research Funding, aimed at helping faculty through the process of applying for external opportunities. This guide can be found on the FSU Office of Proposal Development website under 'Proposal Resources' > FSU Resources. This 157 page guide takes faculty through finding funding, planning a proposal, writing a proposal and then what happens afterward. This resource is available to all faculty, staff and students at FSU. [More Information](#).

FEATURED FUNDING OPPORTUNITIES

Florida Department of Health Fiscal Year 2016-2017 Zika Research Grant Initiative

The Florida Department of Health has issued a Funding Opportunity Announcement for the Fiscal Year 2016-2016 Zika Research Grant Initiative. The Zika Research Grant Initiative shall provide grants for Zika research that support the development, testing, or delivery of a vaccine or other methods to prevent Zika infection; develop innovative, cost-effective Zika Testing methods or therapeutics; and investigate the health impacts of Zika virus on children and adults. Grants will award funding for up to 3 years, and there are four funding mechanisms available. The required letter of intent for all 4 funding mechanisms is **November 10, 2016**. [More Information](#).

Congressionally Directed Medical Research Programs

The Fiscal Year 2016 Defense Appropriations Act provides research funding for the peer reviewed programs managed by the Department of Defense (DOD) Office of Congressionally Directed Medical Research Programs (CDMRP). The programs listed below have multiple award mechanisms. All applications require a letter of intent. Comprehensive Program Announcements will be released during 2016. The Program Announcements include detailed descriptions of funding mechanisms, evaluation criteria, submission requirements, and deadlines. Each Program Announcement may be downloaded from the Grants.gov website <http://www.grants.gov>, or the [CDMRP website](#) upon its release.

- Parkinson's Research Program - Pre-Application deadline is **November 9, 2016**
- Defense Medical Research and Development Program, Developing Models for Military Medical Training from Field Data Collected from Sensors (MATADOR) Award - Pre-Application deadline is **November 14, 2016**
- Reconstructive Transplant Research Program, Concept Award - Pre-Application deadline is **November 23, 2016**

CDMRP Pre-Announcement: Pharmacotherapies for Alcohol and Substance Abuse (PASA) Consortium, Clinical Trial Research Funding Opportunity

The goal of the PASA Consortium is to fund study applications for developing new medications that can be brought to therapeutic use to improve treatment outcomes for alcohol and substance use disorders (ASUD), especially as related to post-traumatic stress disorder (PTSD) and traumatic brain injury (TBI). The upcoming Clinical Trial Research Funding Opportunity is focused on developing new medications that 1) already have an IND for human studies and 2) that can improve treatment outcomes for ASUD related to PTSD and TBI. The Request for Applications (RFA) is anticipated to be made public on or around **December 1, 2016**. Pre-application and application deadlines will be available when the RFA is released. [More Information](#).

Brain & Behavior Research Foundation: NARSAD Independent Investigator Grants

The NARSAD Independent Investigator Grant provides support for investigators during the critical period between the

FEATURED FUNDING OPPORTUNITIES (Cont.)

initiation of research and the receipt of sustained funding. A two-year grant up to \$100,000 or \$50,000 per year is provided to scientists at the associate professor level or equivalent who are clearly independent and have won national competitive support as a principal investigator. *Please note that an assistant professor who is a principal investigator on a NIH R01 grant is now eligible for the NARSAD Independent Investigator Grant.* Basic and/or clinical investigators are supported, but research must be relevant to schizophrenia, major affective disorders, or other serious mental illnesses. The program is intended to facilitate innovative research opportunities. The application window will open from **November - December 2016**. [More Information](#).

Doris Duke Charitable Foundation: Clinical Scientist Development Award

The Doris Duke Clinical Scientist Development Award provides grants to junior physician scientists to facilitate their transition to independent clinical research careers. Pre-proposals are being sought from junior physician-scientist faculty conducting clinical research in any disease area. It is recommended that applicants have significant research experience and strong publication records consistent with the assistant professor rank. *In keeping with the wishes expressed in Doris Duke's will, experiments that use animals or primary tissues derived from animals will not be supported by this program.* The pre-proposal deadline is **November 29, 2016**. [More Information](#).

The McKnight Endowment Fund for Neuroscience 2017 Technology Awards

The McKnight Endowment Fund for Neuroscience supports innovative research designed to bring science closer to the day when diseases of the brain can be accurately diagnosed, prevented, and treated. To this end, the McKnight Endowment Fund for Neuroscience invites letters of intent for the 2017 McKnight Technological Innovations in Neuroscience Awards. These awards encourage and support scientists working on the development of novel and creative approaches to understanding brain function. The Endowment Fund is interested in how a new technology may be used to monitor, manipulate, analyze, or model brain function at any level, from the molecular to the entire organism. *Because the program seeks to advance and enlarge the range of technologies available to the neurosciences, research based primarily on existing techniques will not be considered.* The deadline for the letter of intent is **December 5, 2016**. [More Information](#).

National Science Foundation: Smart and Connected Health Program

The goal of the Smart and Connected Health (SCH) Program is to accelerate the development and use of innovative approaches that would support the much needed transformation of healthcare from reactive and hospital-centered to preventive, proactive, evidence-based, person-centered and focused on well-being rather than disease. Approaches that partner technology-based solutions with biobehavioral health research are supported by multiple agencies of the federal government including the National Science Foundation (NSF) and the National Institutes of Health (NIH). The purpose of this program is to develop next generation health care solutions and encourage existing and new research communities to focus on breakthrough ideas in a variety of areas of value to health, such as sensor technology, networking, information and machine learning technology, decision support systems, modeling of behavioral and cognitive processes, as well as system and process modeling. The application deadline is **December 8, 2016**. [More Information](#).

Simons Foundation Autism Research Initiative 2017 Pilot and Research Awards

The Simons Foundation Autism Research Initiative (SFARI) has issued their 2017 Pilot and Research Awards request for applications (RFA). Grants awarded through this RFA are intended to provide funding for investigators conducting bold, creative and rigorous research into the underlying biology, causes and treatment of autism spectrum disorders. Pilot Awards are intended for investigators who are requesting support for small-scale projects or early-stage experiments that will build on preliminary data or a prior track record and lead to competitive applications for funding by SFARI or other organizations. Research Awards are intended for investigators with demonstrated experience who are requesting support for compelling, high-impact research on an experimental hypothesis for which preliminary data have already been gathered. The required letter of intent deadline is **December 9, 2016**. [More Information](#).

American Association for Cancer Research: Neuroendocrine Tumor Research Foundation Grant

The American Association for Cancer Research's (AACR) Neuroendocrine Tumor Research Foundation Grant represents a joint effort to promote and support innovative cancer research. This grant is available to independent junior and senior investigators to develop and study new ideas and innovative approaches that have direct application and relevance to

FEATURED FUNDING OPPORTUNITIES (Cont.)

neuroendocrine tumors. Proposed research may be in any discipline of basic, translational, clinical, or epidemiological cancer research. Applications are invited from researchers currently in the field as well as investigators with experience in other areas of cancer or biomedical research who have promising ideas and approaches that can be applied to neuroendocrine tumor research. The application deadline is **December 13, 2016**. [More Information](#).

Glenn/AFAR Breakthroughs in Gerontology Award

Sponsored by The Glenn Foundation for Medical Research, in collaboration with the American Federation for Aging Research (AFAR), the "Breakthroughs in Gerontology (BIG)" initiative provides timely support to a small number of research projects that are building on early discoveries that show translational potential for clinically-relevant strategies, treatments and therapeutics, addressing human aging and health span. Two awards will be made in 2017, at the level of \$200,000 total (\$100,000 per year). The required letter of intent deadline is **December 15, 2016**. [More Information](#).

National Science Foundation's Collaborative Research in Computational Neuroscience (CRCNS) Innovative Approaches to Science and Engineering Research on Brain Function Program

Through the CRCNS program, the National Science Foundation (NSF), the National Institutes of Health (NIH), the German Federal Ministry of Education and Research, the French National Research Agency, and the United States-Israel Binational Science Foundation (BSF) support collaborative activities that will advance the understanding of nervous system structure and function, mechanisms underlying nervous system disorders, and computational strategies used by the nervous system. Two classes of proposals will be considered in response to this solicitation: [Research Proposals](#) describing collaborative research projects; and [Data Sharing Proposals](#), to enable sharing of data and other resources. The full proposal deadline is **December 19, 2016**. [More Information](#).

American Gastroenterological Association: Elsevier Pilot Research Award

The American Gastroenterological Association is offering the Elsevier Pilot Research Award; this research initiative grant for \$25,000 for one year is offered to investigators to support pilot research projects in gastroenterology- or hepatology-related areas. The objective of this award is to provide non-salary funds for new investigators to help establish their research careers or to support pilot projects that represent new research directions for established investigators. The intent of this award is to stimulate research in gastroenterology- or hepatology-related areas by providing time for investigators to obtain new data that can ultimately lead to subsequent grant applications for more substantial funding and duration. The application deadline is **January 6, 2017**. [More Information](#).

The Leukemia & Lymphoma Society Translational Research Program

The Translational Research Program through the Leukemia & Lymphoma Society funds new and innovative research that shows high promise for translating basic biomedical knowledge to clinical application. Applications are sought proposing novel approaches to the prevention, diagnosis or treatment of hematological malignancies and related pre-malignant conditions. Proposals should be based on molecular, cellular or integrated systems findings and be conceptually innovative. The application should have a clear plan for the clinical translation of the studies proposed and the results expected. There are three separate Requests for Proposals (RFP) for this program: the Leukemia-Lymphoma RFP, the Familial Platelet Disease (FPD)/RUNX1 Translational Research RFP, and the Myeloma RFP. The letter of intent deadline for all three RFPs is **January 13, 2017**. [More Information](#).

New NIH Request for Applications: Circadian Mechanisms Contributing to Obesity, Diabetes Metabolism, and Underlying Heart, Lung, and Blood Disorders (R01)

The National Heart, Lung, and Blood Institute (NHLDBI) and the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) have announced a new Request for Applications (RFA), which invites applications for clinical research to elucidate circadian-dependent mechanisms contributing to the pathophysiology of human obesity, diabetes-related metabolism, obesity-coupled risks for heart, lung, and blood disease, and the identification of novel therapies to improve circadian rhythm for primary or secondary prevention of obesity-associated disease risks. Multi-disciplinary, multiple-investigator teams proposing mechanistic clinical studies to elucidate the relationship of circadian rhythm to causal pathways of disease are encouraged. The deadline for the letter of intent is **February 14, 2017**. The full application deadline is **March 14, 2017**. [RFA-HL-17-020](#).

OTHER FUNDING RESOURCES

Pivot

From any on-campus computer, go to <http://pivot.cos.com>. FSU's IP addresses will be recognized by Pivot, so you can start searching for funding opportunities right away. Creating a Pivot account is easy—at the website, click “Sign up” in the upper right corner. Once registered, you can log in with a Pivot username and password anytime, anywhere. Logging in allows you to manage active or tracked funding opportunities, save searches, share opportunities, and search for potential collaborators. Username and password access is necessary when you are off-campus or when you want to save a funding record or funding search.

FSU Foundation Search Tool and Corporate Development Assistance

For grant funding assistance related to your programmatic research and academic initiatives, the Office of Corporate & Foundation Development is happy to provide institution-wide access to the Foundation Center Online database accessible through FSU IP. [Click here](#) to begin your search of over 100,000 private foundations and charities.

The FSU Foundation can also assist researchers by establishing relationships with corporations and private foundations. Corporate Development staff members will work with you on proposal and concept development, private foundation or corporation research, and the submission process of grant proposals. SUBMITTING PROPOSALS FOR GRANTS AND CONTRACTS

College of Medicine, Office of Research Administration (Med-RA)

Help us help you! The sooner you let us know of your intent to submit a proposal for extramural funding, the sooner **we can help you navigate** the paths to a successful submission. Our goals are to **assist you with the CoM requirements and those of FSU Sponsored Research Administration (SRA)**, or in the case of private funding, the FSU Research Foundation (FSURF); **minimize the administrative burden; and meet sponsor guidelines** in a seamless, integrated fashion.

SRA/FSURF requires "complete" proposals three business days in advance of the sponsor's deadline. *Please note that generally our office works on a first in, first out basis.* If you **contact us at least 30 days in advance**, together we can identify, gather, or create the elements/components, then assemble the application by the SRA/FSURF deadline for institutional approval. **The goal is to have, in hand, no later than 10 business days before the sponsor's deadline, all the elements needed to assemble the components for a complete proposal** for SRA/FSURF. Piecemeal in advance of this goal is appropriate and encouraged.

10-Day Advance Proposal Preparation Guidelines

Contact Med-RA at research@med.fsu.edu for proposal preparation assistance.
