Overview

Four Year Medical Curriculum

Course Goals

**USMLE Step 1 Preparation** [Course number BMS 6960] allows time, faculty support, and resources for adequate preparation for the USMLE Step 1 exam through self-directed learning. The course uses formative evaluation with the NBME (National Board of Medical Examiners) Comprehensive Basic Science Examination (CBSE), a nationally normed achievement test that covers material learned in the pre-clerkship phase of the curriculum. The exam resembles the USMLE Step 1 exam in both content and question format. Each student receives a performance profile from this exam that identifies areas of relative and absolute strength and weakness that can guide their study plan. **USMLE Step 1 Preparation** provides a maximum of 6 weeks of protected study time. Students who take the Step 1 exam earlier than the mid-April deadline spend the remainder of the 6 week block engaged in any required remediation of clinical skills identified in the high stakes summative OSCE or other course work. A passing score on the Step 1 exam (currently 192) and a passing score on the high stakes summative OSCE are required for a student to proceed into the clinical clerkship phase of the curriculum. Additional activities available to students include service learning activities focused on mission-based geriatric, rural, and other underserved populations, enrichment activities including interprofessional education and medical humanities, and vacation.

Learning Objectives

The global course objectives are:

1. Demonstrate the skills and habits of self-directed, life-long learning: self-assessment of learning needs and the ability to address those needs with appropriate materials and assistance.
2. Demonstrate readiness to take the USMLE Step 1 exam, including through performance on the formative CBSE.
3. Demonstrate readiness for clerkship rotations through defined competencies in patient care, medical knowledge, and communication skills.
4. Demonstrate a commitment to ethical and professional behaviors in all activities and interactions with peers, faculty, staff, and the community.

Course Format

The course is comprised of protected time and academic support for students to prepare for and complete two “high stakes” hurdles which must be successfully passed before continuing into the clinical clerkship phase of the curriculum. **USMLE Step 1** is the first of four exams required for medical licensure in the United States. Step 1 is most commonly taken after completing the part of the medical curriculum which emphasizes basic
science. It is a day-long, comprehensive assessment of the student's knowledge base and mastery of the sciences basic to the practice of medicine. It is designed to assess understanding and ability to apply concepts and mechanisms that underlie human health and disease and which are the foundation of therapeutic strategies. Although the Step 1 exam has a “Pass/Fail” requirement to proceed in the curriculum, the student's absolute performance on the exam is one of the most important determinants of their ability to earn a residency spot (“Match”) in their specialty and program of choice. Adequate preparation requires not only review of extensive material, but also practice with the format (clinical vignettes with “one best answer” vs “one right answer” questions) and pacing (1 min 22 sec / item) of this high-stakes exam. Early in the protected period faculty will provide targeted high-yield review of concepts and content identified by the aggregate performance on the diagnostic CBSE. Throughout the block, faculty experts will be available to students for individual assistance. Once the student has taken Step 1, any required remediation of the OSCE will be addressed by individual clinical faculty mentoring and reassessment. Nationally, medical schools schedule between 1 and 2 months of protected time for Step 1 preparation.

**Professionalism**

Medicine is a Profession, which means it entails unique responsibilities and obligations as well as unique privileges. “Professional identity formation” is an objective as important as learning the sounds and anatomy of the heart, but requires a different set of learning skills. Important among those are reflection, self- and peer assessment, deliberate practice, and learning for mastery (not grades).

Two essential Professional behaviors that will become a part of your everyday life are founded on respect for patients:

**Confidentiality:** Patients — including Standardized Patients — deserve to be treated with respect. Respect for patients includes keeping all patient information confidential. Patient information may be shared with other health care professionals that have a legitimate, professional “need to know,” or with specific family members, friends, or others that have permission from the patient for access to the information.

Be especially conscientious about discussions of patients in public places. Even when patient names are not used, the discussion may reveal the patient's identity to others who overhear the discussion. Rather than risk a violation of patient confidentiality, discuss patients only in a private setting and only with individuals who have a legitimate need to know.

Be careful to keep all patient notes, reports and materials confidential. Patient records, should be returned to faculty, destroyed, or kept in a secure place.

Similarly, your classmates deserve to be treated with respect. Information learned about your classmates and their families while in class is considered confidential. You are not free to disclose this material to others without the specific consent of the person.

Violation of confidentiality may result in a Report of Concern for Unprofessional Behavior [see Student Handbook] and may be referred to the Student Evaluation and Promotion Committee (SEPC). Egregious unprofessional behavior of any variety may result in suspension of the student, a failing grade for the course, and/or referral to SEPC.

**Professional Attire:** Medical students, faculty and staff are all ambassadors and representatives of the College of Medicine and of the medical profession. Appearance and behavior should at all times demonstrate respect for the profession and for our patients. The needs of patients must always come first, and any barriers to meeting those needs (including attire, appearance and grooming) must be removed.

Professional attire should be worn in settings where students interact with people from outside the COM, and particularly when interacting with Standardized Patients (SPs) in the CLC, on a “house visit,” or when in a preceptor's office or clinic, a hospital or nursing facility. Professional attire should also be worn when patients, guests, or visitors are present in large or small group sessions.

Specific standards for professional attire for men and for women are detailed at the end of this document.
## Competencies

<table>
<thead>
<tr>
<th>Competency Domains</th>
<th>Course Objectives</th>
<th>Methods of Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Patient Care</strong></td>
<td>Demonstrate the ability to select, perform, interpret, and appraise elements of pertinent history, physical examination, and diagnostic testing appropriate for a patient visit.</td>
<td>OSCE</td>
</tr>
<tr>
<td></td>
<td>Demonstrate the ability to generate a differential diagnosis, justified by basic and clinical science concepts.</td>
<td></td>
</tr>
<tr>
<td><strong>Knowledge for Practice</strong></td>
<td>Describe the development, structure and function of the healthy human body and each of its major organ systems at the macroscopic, microscopic, and molecular levels.</td>
<td>CBSE</td>
</tr>
<tr>
<td></td>
<td>Recognize and discuss the implications of altered structure and function of the body and its major organ systems.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Identify changes in the structure and function of the human body associated with the aging process and distinguish normal changes associated with aging from those that denote disease.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Apply basic bio-behavioral and clinical science principles to analyze and solve problems related to the diagnosis, treatment and prevention of disease.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Describe normal human psychosocial development across the life-span and predict the consequences significant deviations.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Apply basic science principles to explain the choice and effective use of pharmacotherapeutic agents and other therapeutic modalities.</td>
<td></td>
</tr>
<tr>
<td><strong>Practice-based Learning and Improvement</strong></td>
<td>Demonstrate the habits of life-long learning – the identification of personal knowledge gaps and application of strategies to find and interpret information to address those gaps.</td>
<td>Faculty observation; self-assessment</td>
</tr>
<tr>
<td><strong>Communication and Interpersonal Skills</strong></td>
<td>Use accurate and appropriate vocabulary and concepts to communicate effectively with peers, faculty and patients about health and disease.</td>
<td>OSCE</td>
</tr>
<tr>
<td></td>
<td>Demonstrate respect, empathy, compassion, responsiveness and concern regardless of the patient's problems, personal characteristics.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Communicate diagnostic information and reasoning, intervention options, and a suggested plan of care with truthfulness, sensitivity and empathy.</td>
<td></td>
</tr>
<tr>
<td><strong>Professionalism</strong></td>
<td>Maintain confidentiality for patient information.</td>
<td>Faculty observation</td>
</tr>
<tr>
<td></td>
<td>Demonstrate professional behavior in all activities and interactions with peers, faculty and the community.</td>
<td></td>
</tr>
</tbody>
</table>

**Recommended Materials (all textbooks required in preclerkship courses are available as ebooks through COM library course page)**

- Basic and Clinical Pharmacology (Katzung)
- Basic Immunology (Abbas)
- Bates Guide to Physical Examination and History Taking
- Behavioral Science in Medicine (Fadem)
- Cecil Essentials of Medicine (Benjamin)
- Diagnostic and Statistical Manual of Mental Disorders (DSM-5)
- Felson’s Principles of Chest Roentgenology (Goodman)
- Histology: a text and atlas with correlated cell and molecular biology (Ross)
- How the Immune System Works (Sompayrac)
- Medical Biochemistry - An Illustrated Review (Panini)
- Langman’s Medical Embryology (Sadler)
- Physiology (Costanzo)
- Rapid Interpretation of EKGs (Dubin)
- Resolving Ethical Dilemmas (Lo)
- Robbins and Cotran Pathologic Basis of Disease (Kumar)
- Sherris Medical Microbiology (Ryan)
- Rapid Review Pathology (Goljan)
- Pathoma Pathology review (individual subscription)
- USMLE World Question bank (3 month subscription provided)
1. Other materials **required** for the OSCE
   a. Clinical examination equipment: stethoscope with diaphragm, bell and pediatric option, oto/ophthalmoscope, #128 and #512 tuning forks, penlight, reflex hammer, Rosenbaum eye chart and a sphygmomanometer with pediatric, adult, and large adult sized cuffs.
   b. Also:
      - A watch capable of measuring seconds
      - A pen for writing (blue or black ink)
      - The student’s personal mobile device loaded with the appropriate medical software/applications.

---

**Grading System**

**Description of Student Assessment Methods and Grading**

**Written exams**

The NBME Comprehensive Basic Science Examination (CBSE) will be used to guide student self-directed study and document preparedness to take the USMLE Step 1 licensing exam. In AY 2015-2016, a scaled score of 67 was predictive of a minimal passing score (192) on the Step 1 exam.

The USMLE Step 1 exam is administered by appointment by the NBME at an approved testing location. Second year students in good standing must apply for a 3-month eligibility period through the NBME Licensing Examination Services website no later than the end of the 2nd week of February. After approval of the application (which can take up to 4 weeks), the student will receive a scheduling permit which allows him/her to schedule the exam at the testing center within that eligibility period. The 2016 Step 1 fee was $600. **Students must take the Step 1 examination no later than the end of the second week of April** in order to assure availability of their score in time to proceed to the first clinical rotation (begins at the end of May). Students with unusual circumstances that prevent them from taking USMLE Step 1 by the end of the second week in April must, as soon as possible, petition in writing to the Associate Dean for Student Affairs and the Senior Associate Dean for Medical Education and Academic Affairs to be allowed to delay the exam and the start of their clerkships. Failure to adhere to these deadlines will jeopardize the student’s good standing and may delay the start of their Year 3 clerkships (see Student Handbook).

**Objective Structured Clinical Examination (OSCE)**

There will be a summative OSCE for demonstration of required skills. Each station will require the student to demonstrate one or more clinical skills/behaviors that will be assessed by a trained observer using established performance criteria for that assessment. Students must score ≥ 80% on the OSCE in order to be eligible to move forward to the clinical clerkships.

**Grading**

The FSU COM has adopted a pass/fail grading system which is used in the curriculum for the first and second years (See Student Handbook). To achieve a grade of Pass in BMS 6960 (USMLE Step 1 Preparation) a student must meet all of the following requirements:

1. Demonstrate appropriate commitment to self-directed learning, including formative use of the results of the CBSE to identify knowledge gaps and individual meetings with faculty and academic counselors for additional guidance and feedback as appropriate.

2. A passing score on the USMLE Step 1 licensing exam. The current Step 1 passing score set by the NBME is ≥ 192. Students who do not achieve a passing score on the Step 1 exam will receive an “I” (Incomplete) grade for the course and will be referred to the Student Evaluation and Promotion Committee and to Academic Counseling to develop an appropriate remediation plan to prepare to retake the exam.
3. A score $\geq 80\%$ on the summative OSCE. Students who do not achieve a score of 80% or higher on the OSCE will receive an "I" (Incomplete) grade for the course and must remediate these clinical skills. This remediation must be coordinated with the clinical skills director and the CLC director, and must be completed prior to starting their first clinical clerkship at their assigned regional campus. Students scoring below 80% who are unable to successfully remediate will be referred to the Student Evaluation and Promotion Committee.

4. Demonstrate of the attitudes and behaviors of Medical Professionalism in all activities and interactions with peers, faculty, and the community. Professionalism concerns may generate a Report of Concern for Unprofessional Behavior (see Student Handbook) and referral of the student to the Student Evaluation and Promotions Committee, and may result in receiving a grade of fail in the course.

**Course Evaluation**

Students will have the opportunity to provide constructively feedback throughout the block. Feedback is encouraged at all times on all components of the course and will assist in providing a timely continuous quality improvement.

**Policies**

**Americans with Disabilities Act**

Candidates for the M.D. degree must be able to fully and promptly perform the essential functions in each of the following categories: Observation, Communication, Motor, Intellectual, and Behavioral/Social. However, it is recognized that degrees of ability vary widely between individuals. Individuals are encouraged to discuss their disabilities with the College of Medicine’s Director of Student Counseling Services and the FSU Student Disability Resource Center to determine whether they might be eligible to receive accommodations needed in order to train and function effectively as a physician. The Florida State University College of Medicine is committed to enabling its students by any reasonable means or accommodations to complete the course of study leading to the medical degree.

**The Office of Student Counseling Services**

Medical Science Research Building, G146
Phone: (850) 645-8256  Fax: (850) 645-9452

This syllabus and other class materials are available in alternative format upon request. For more information about services available to FSU students with disabilities, contact the:

**Student Disability Resource Center**

874 Traditions Way
108 Student Services Building
Florida State University
Tallahassee, FL 32306-4167
Voice: (850) 644-9566  TDD: (850) 644-8504
sdrc@admin.fsu.edu

**Academic Honor Code**

The Florida State University Academic Honor Policy outlines the University’s expectations for the integrity of students’ academic work, the procedures for resolving alleged violations of those expectations, and the rights and responsibilities of students and faculty members throughout the process. Students are responsible for reading the Academic Honor Policy and for living up to their pledge to “...be honest and truthful and...[to] strive for personal and institutional integrity at Florida State University.” (Florida State University Academic Honor Policy, found at http://fda.fsu.edu/Academics/Academic-Honor-Policy)

**Attendance Policy**

The College of Medicine has detailed attendance policies as they relate to each cohort and events that conflict with course schedules. See pages 28-29 of FSUCOM Student Handbook for details of attendance policy, notice of absences and remediation.

Unexcused absence from a scheduled examination or quiz may result in a score of zero (0 %) being assigned for that assessment. Unexcused absence from an activity for which attendance is required (for example, Small Group session) may be considered as an issue of Professionalism. Any unexcused absence may require completion of the Performance Improvement Plan (see Grading section, above).
Clinical Learning Center (CLC) Specific Absence Policy

**Objective Structured Clinical Examination (OSCE)**

If a student knows he/she will not be able to participate in the OSCE, he/she should complete and submit the appropriate forms to Student Affairs, and, if within 24 hours of the time he/she is scheduled for the OSCE, contact Ms. Danforth. If the absence is excused by Student Affairs, the student will receive an "I" (incomplete) grade and be required to complete a make-up OSCE at a designated time after the course has ended.

Any excused absence—whether planned or unplanned—will not impact the student's grade.

Any absence that does not qualify as an excused absence per Student Affairs is an unexcused absence. These generally are due to circumstances within the student's control. Examples of unexcused absences include the student who forgets about an OSCE session, the student who skips an OSCE to study for an exam and/or any absence where an able student fails to follow the procedures above if they are not able to participate in the OSCE. **An unexcused absence will result in failure of both the OSCE and the course.**

---

**Professional Attire**

Professional attire consists of clothes consistent with community norms for physicians. Examples of these norms in Tallahassee are: no jeans, seductive, revealing or tight-fitting clothes, sheer or see-through fabrics, strapless, low-necked or midriff-baring clothes, shorts, sweats, hats, or open-toed shoes.

**For men,** professional attire consists of slacks, a collared shirt and dress or casual shoes (no sport shoes or sandals). Ties may be either required or forbidden in some clinical situations.

**For women,** professional attire consists of slacks or a conservative length dress or skirt with a blouse or sweater. Skirt edge should rise no higher than 2" above the top of the knee during all clinical care and training maneuvers and should not be tight-fitting. Heels more than 3" in height are **never** appropriate in clinical settings.

**For both men and women,** a white lab coat is required.

**Professional appearance:** Long hair must be pulled back and secured. Facial hair must be neatly groomed. If possible, all tattoos should be covered by clothing. No visible body piercing except a single piercing in each ear. No large earrings or loose jewelry. Fingernails must be trimmed. If nail polish is worn, it should not be a distracting color. No strong perfume or other scented products. In compliance with OSHA regulations, closed-toed shoes are required in all clinical settings—including the CLC.

The established “norms” of certain clinical settings may modify these standards for professional attire, but any variations in professional attire must be approved by the student’s supervisor. Consult your supervisor to clarify expectations for student attire in any ambiguous or new situations.
