Internal medicine resident graduation

Dr. Dean Watson, chief medical officer, TMH, and Dr. John Fogarty, dean, FSU College of Medicine, provided opening remarks to all in attendance.
Our 2016 family medicine graduates
AT LEE MEMORIAL HEALTH SYSTEM

The residents enjoyed their special evening held at Harborside - City Pier. Front Row: Drs. Sherry Farag, Lucia Huffman and Jack Arnold. Back row: Drs. James Toldi and Roy Klossner.

Dr. Carl Nyberg received the Outstanding Resident for Inpatient Medicine award presented by Dr. Alfred Gitu, faculty.

Dr. Lee Coghill received the Outstanding Resident for Pediatrics award presented by Dr. Brian Selius, faculty.
Welcome to new Family Medicine Residency Coordinator Katelyn Caldwell.

Katelyn is a graduate of Morehead State University with a Bachelor of Business Administration. She has experience as a medical staff recruiter, a proven ability to work professionally and pleasantly with the public, and strong team-building skills. Katelyn will work closely with Dr. Gary Goforth, program director, as well as our GME program manager, Connie Donohoe. Katelyn begins her role as program coordinator at full capacity, and with an upcoming Accreditation Council for Graduate Medical Education site visit for reaccreditation. We wish her the best in this new position, and know she will be a tremendous asset to the program.

Congratulations to Internal Medicine Residency Coordinator Inez Hudlow.

Inez was recently invited to join the Survey Committee of the Program Administrators Advisory Council, which is part of the Association of Program Directors in Internal Medicine. This committee is charged with coordinating the creation, distribution and analysis of all program administrator surveys and data.

Congratulations to GME Program Associate Jessee Graham for completion of the FSU Frontline Leadership Program.

Mr. Graham successfully finished 12 sessions with corresponding post-tests in the area of human resources. The program helps develop team leaders with a focus on policies and procedures, as well as compliance issues specific to FSU.

Residents enjoyed a weekend retreat this spring and came up with lots of ideas to make the residency program even stronger. Each class met to discuss several issues and provide feedback on the program. The program director then met with class representatives the next day to receive the feedback and respond to some of their requests. The co-chief residents shared this information with faculty at the annual faculty retreat and Annual Program Evaluation as they formulated changes for the new academic year. Residents, thank you for your great discussion and ideas to help the residency program.

Dr. Kaisa van der Kooi, Micrographic Surgery and Dermatologic Oncology Fellow, was recently interviewed by local television station WTXL about the possibility of summer leaving a lasting mark on skin. Discussion included differences between UVA and UVB rays, photoaging, and the use of sunscreen and bug spray together.
A Message from the DIO

Dr. Joan Younger Meek

This issue of Residency Review recognizes the accomplishments of the College of Medicine GME-sponsored residency programs and the newest graduates of those programs. Congratulations to each of these new alumni on the successful completion of their residency or fellowship training with the College of Medicine. We wish them the best as they begin the next phase of their careers.

All eight 2016 graduates of the Internal Medicine Residency Program at Tallahassee Memorial HealthCare will be staying in the Florida-Georgia area, with one remaining as a faculty member in the program, one continuing training in a rheumatology fellowship, and the others serving as hospitalists. Of the five graduates of the Family Medicine Residency Program at Lee Memorial Health System, two will be practicing in the Fort Myers area, one will practice in Winchester, Kentucky, one will pursue a fellowship in sports medicine, and one will practice in Honduras, helping to mentor residents in the FM program and others interested in global health opportunities.

We had a successful Match in March and are welcoming residents to the General Surgery Residency Program at Tallahassee Memorial HealthCare and to the Dermatology Residency Program at Dermatology Associates of Tallahassee for the inaugural year of those training programs. We also received notification this spring of the initial accreditation for the Internal Medicine Residency Program at Sarasota Memorial Hospital, which begins recruitment during 2016-2017, to start training residents in July 2017. The Internal Medicine Residency Program at Tallahassee Memorial HealthCare was granted continued accreditation by the ACGME.

We held an orientation at the College of Medicine on June 27 for incoming residents, about whom we will be sharing more information in our fall newsletter. We are thrilled that nine of our incoming residents are graduates of our own FSU College of Medicine.

Kathleen Mattis, formerly the program coordinator for the FM Program at Lee Memorial, has transitioned into the role of program coordinator for the General Surgery Program at TMH. Katelyn Caldwell has taken over as the program coordinator in the FM Program. In addition, Katie Axiotis continues her orientation to her duties as the program coordinator in IM in Sarasota. We value the support that all of the coordinators provide to our GME programs.

Finally, Dr. Chris Mulrooney, our assistant dean for graduate medical education, will be transitioning out of the GME Office, as he devotes leadership full-time to his duties as Chief Operating Officer of the College’s faculty practice plan. Since he is responsible for overseeing the operations that support all clinical training and services within the College, he will continue to support the GME Division in certain functions. We appreciate all that Dr. Mulrooney has contributed during the growth of the GME Division and value his ongoing support.

Medical missions

Representatives from the family medicine residency had an incredible medical mission trip to Olanchito, Honduras. The team of 13 saw about 1,400 patients, fitted 330 pairs of glasses, and did over 50 joint injections despite losing three providers just before the team departed (two who missed the flight and one with illness). Dr. Lee Coghill represented our program well and did a great job working with a PA student from Quinnipiac University. Participants had the opportunity to work with the Village Health Worker program and meet with the local Rotary Club to discuss current and future Global Grant water projects. The Rotary Club of Olanchito even expressed interest in sponsoring a new village health worker.
Internal Medicine participates at ACP meeting

FSU’s newly accredited Internal Medicine Residency Program at Sarasota Memorial Healthcare System was represented at the American College of Physicians, Florida Chapter, 2016 Annual Residents and Medical Students Meeting. Dr. Wilhelmine Wiese-Rometsch served as a judge for the formal poster competition for internal medicine residents, and participated in the meeting as an exhibitor.

New family members

Congratulations to Dr. Chelsey and PJ Scheiner on the birth of Jett Paxton Scheiner on May 23 at 9:51 a.m. Jett weighed 6 pounds 14 ounces and was 19.5 inches long.

Congratulations to Dr. and Mrs. Lee Coghill on the birth of Houston Coghill on May 29. He weighed 9 pounds and was 21.5 inches long.

A word from Dr. Mulrooney

Since my arrival at the College in 2010 from career-long health care executive and organizational development roles, it has been my pleasure developing the operational structure as the Assistant Dean for this growing division. Thank you to all of my GME colleagues, who have been instrumental in our success stories thus far. I look forward to witnessing a lot more from (slightly) outside the GME Office, as I now focus exclusively on growth of our medical practices. Keep up the great work!
Year-end celebrations for IM at TMH

Program Director Dr. Greg Todd, presenting internship completion certificates to preliminary residents. 1. Dr. Christina Kim; 2. Dr. Mike Yuan; 3. Dr. Melia Holt; 4. Dr. Adam Engel.

At left, Dr. Todd presenting nurse Cavel Barrett, Internal Medicine Residency Clinic, the Outstanding Service Award.

Updates from IM at SMH

Midwest Residency Recruitment Fair, Wayne State University, Detroit, Michigan, June 7
Dr. Wiese-Rometsch and Katie Axiotis represented the program at Wayne State, the largest single-campus medical school in the nation. Dr. Wiese-Rometsch was a faculty member at Wayne State University for 15 years. The recruitment fair was a great opportunity to speak to students face-to-face and answer questions about the newly accredited program.

Sarasota Regional Campus, June 23
Dr. Wiese-Rometsch and Dr. Karen Hamad welcomed the Sarasota Campus Class of 2018 students during the Sarasota Memorial Health Care System orientation. Dr. Wiese-Rometsch also encouraged students to improve their academic résumé (i.e., posters and papers) on their path to residency.

Other Campus Visits
Dr. Wiese-Rometsch and Katie Axiotis are visiting the other regional campuses to deliver the same presentation:
- Tallahassee- June 29
- Fort Pierce- Aug. 10
- Daytona- Aug. 17
- Orlando- Sept. 28
- Pensacola- To be determined

Florida American College of Physicians Chapter Meeting
Dr. Wiese-Rometsch and Katie Axiotis will represent the program at the FACP Chapter Meeting Sept. 9-11 in Key Largo.

News from FM
- 100 percent board completion and pass rate for all six graduates to date.
- ACGME resident and faculty surveys show scores above national average in every category. Congratulations.

Using Your FSUID to Access Library Resources: Be an Early Adopter
You will soon need an FSUID and password in order to access licensed resources from the Maguire Medical Library. The option for using your College of Medicine username and password for access will no longer be available later this year. You can already use your FSUID to access library resources, so why not go ahead and make the switch? Your FSUID is usually shorter, and you don’t have to remember to change the default login type.

If you have any questions about your FSUID and whether you have one set up, you can contact your residency coordinator. For more information about this upcoming change, please see our FAQs on the library website.

About Us: For Residents
Need a refresher about what the Maguire Medical Library has to offer? Visit our “For Residents” page in the About Us section of our website: http://med-fsu.libguides.com/about/residents

There, you will find a list of our services, as well as links to the resources that may be the most useful for your needs. Please let us know (medlibrary@med.fsu.edu) if there are other materials we should spotlight for residents.

Student participation
2016 American College of Physicians, Florida Chapter, Annual Residents and Medical Students Meeting

Dr. Wilhelmine Wiese-Rometsch reviews the poster presentation of Florida State University medical student Kaitlin Nicholson. Kaitlin is a student in the Class of 2017 at the Orlando Regional Campus.

Dr. Wiese-Rometsch discusses residency opportunities in the newly accredited IM program.
Robotic Resection of a Pancreatic Tail Tumor Resulting in an Intrapancreatic Accessory Spleen
Alexander Ramirez, MD; Wade Douglas, MD, FACS
Florida State University College of Medicine General Surgery Residency Program

Introduction
Accessory spleen has been reported in about 30% of autopsy studies (1) and up to 65% of patients after splenectomy (2). The tail of the pancreas is the second most common location of accessory spleen (1). It is very important to identify the intrapancreatic accessory spleen without invasive diagnostic tests because there are few real indications for surgical resection (3). Intrapancreatic accessory spleen has rarely been noted radiologically before surgery and when there is a concern about the differential diagnosis, especially with very high vascular tumors, surgical resection is indicated.

Case Report
We presented a case of a 33 year-old male with a history of recent cholecystectomy that developed nausea and vomiting few days after been discharge of the hospital. He was seen in the Emergency Room for these symptoms and a CT scan of the abdomen and pelvis revealed a 2.9 cm solid tumor in the tail of the pancreas (Figure 1, 2). The patient denied fatigue, diarrhea, hypoglycemic or syncopal episodes. All the endocrine markers were negative and the patient was scheduled for a robotic distal pancreatectomy and splenectomy. The procedure was done robotically and during the procedure we used the laparoscopic ultrasound probe to identify the location of the pancreatic mass (Figure 3) and to confirm the total resection after the distal pancreatectomy was performed (Figure 4). The patient had an uneventful post operative period and was discharged home in the post operative day 2 in stable condition. The pathology report shows a 2.5 x 2.5 cm accessory spleen involving the parenchyma of the tail of the pancreas (Figure 5).

Conclusion
Intrapancreatic accessory spleens can radiographically mimic a malignant process. Surgery with pathology evaluation of the specimen is the only reliable means of diagnosis. This surgical procedure can be done open, laparoscopically or with the robot in a safe way. While intrapancreatic accessory spleen is a very rare condition, it is an important component of a complete differential diagnosis for a patient presenting with a pancreatic tail tumor.
